# Build Your Own

The Spryker Commerce OS is a „beyond desktop – beyond shop“ commerce technology, enabling transactional use cases at every current and future touchpoint. It comes with a clear separation of frontend and backend and provides all Features for a successful commerce business. You can choose out of 400+ decoupled modules (backend), that are clustered into functional Capabilities and frontend Touchpoints, which we call Apps, that are all integrated via APIs. This way you can build one or multiple customer experiences relevant for your business, from a traditional B2C/ B2B online shop, a marketplace over to a mobile Web App or newer forms such as voice or bot commerce.

Meet your customer everywhere, anytime.

## Capabilities

The Spryker Commerce OS consists of decoupled Capabilities which are grouped Features. Each Capability is independently upgradeable and clusters a different functional area. Any frontend (APP) can be accessed via an API integration.

Product Attributes

# Product Management Features

## Product Attributes

Super Attributes in the Spryker Commerce OS are used to distinguish between the different Product Variants of an abstract product. Super Attributes define each Concrete Product and can consist of whichever distinguishing feature you wish to highlight, such as size or color. This information can either be manually managed or imported and processed automatically.

Consider the example of a T-shirt, the Abstract Product, that is available in the sizes small, medium, and large, three different Product Variants. The Abstract Product “T-shirt” appears as a search result. On the product detail page the customer can select between the product variants small, medium, large and put it into the cart.

## Product Recommendations

With the Product Recommendations feature you can show your customers similar or complementary items while browsing the store.

## Product Groups

To enhance the visual shopping experience for your customers, you can easily group together different products by any attribute you wish, like color or size. The respective product group will then be displayed as a single item in the shop. In the backend, you can view all product group items from the product page.

## Product Abstraction

With the Spryker Commerce OS you can easily build a product hierarchy structure with Abstract and Concrete Products.

Products can come with multiple Variants, such as size or color. In order to provide a better shopping experience to your customers, the different Variants, or Concrete Products, are grouped under an Abstract Product. The topmost hierarchy level, the Abstract Product, does not have its own stock, but defines various default properties for the descendant Concrete Products, or Variants. The Concrete Product, or Variant, always belongs to one Abstract Product, has a distinctive stock and always differs from another Concrete Product with at least one Super Product Attribute.

## Product Relations

Product Relations let you define a list of items that will be displayed as comparable or additional products. To up-sell items, you can build a set of suggestions to offer upscale product versions or additional fixtures to maximize the cart value. You can also easily establish product associations that let your customers see recommendations of products they might also like, to encourage cross-selling. You can choose to either use Spryker's condition rule builder to manually define relations or import the information from an external source.

## Product Sets

Let your customers shop for special product sets that can be manually curated based on any characteristic of the products you wish.

The “Shop-the-Look” function is a prominent example of a Product Set, where you can build a collection of items based on relations or recommendations. This could be a stationary set for your customers workspace, a set of clothing or accessories and furniture for a specific room.

Product Sets come with their own standalone catalog and detail pages for the shop. You can freely define an order of appearance of products within a set and on the catalog page. Also, Product Sets can be placed in CMS placeholders to place them throughout your shop.

Your customers can select variants per product, add an individual product from a set and or all products from the set to the cart with one click.

## Timed Product Availability

You can clearly define timeframes for the availability of products, without having to manually manage the inventory. This is especially useful for promotions or seasonal items.

## Dynamic Product Labels

You can assign Product Labels to highlight specific products in your shop. Customize the look and text of the Labels as they appear in the shop. Any association can be a Label, such as “Sale” or “Christmas”.

Products that are new in your shop can automatically be marked with the Dynamic Product Label “New” for a pre-defined time range.

You can add validity dates to labels, sort them by importance or relevance and allow your customers to filter and search for them in your shop.

## Product Options

You can easily offer services on top of a customer’s choice of products, such as gift wrapping, insurance, warranty or anything else that you may want to add that is not physically part of the product. The options can have their own price value and will be added to the total cart value.

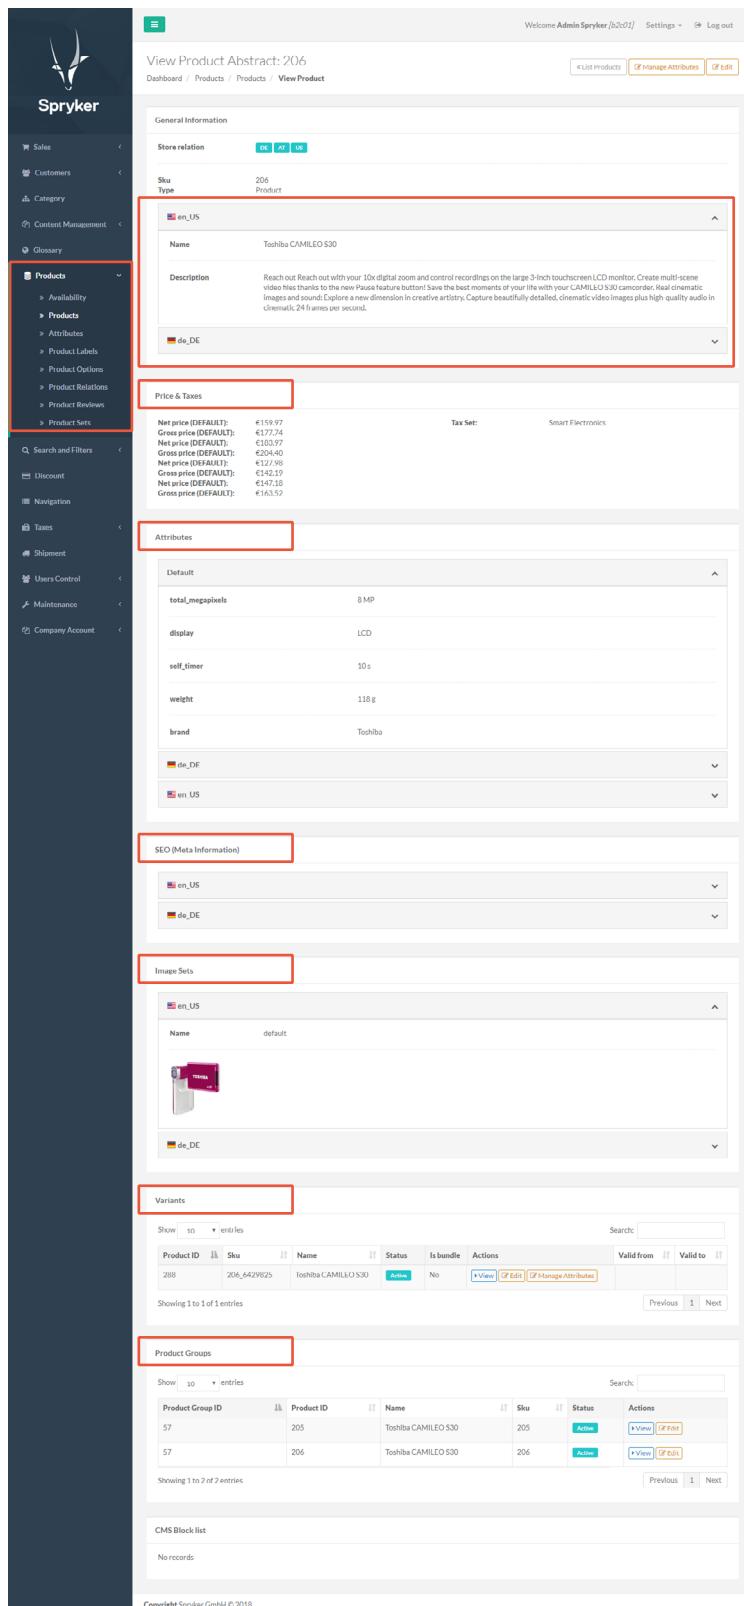

## Super Attributes

Super Attributes in the Spryker Commerce OS are used to distinguish between the different Product Variants of an abstract product. Super Attributes define each Concrete Product and can consist of whichever distinguishing feature you wish to highlight, such as size or color. This information can either be manually managed or imported and processed automatically.

Consider the example of a T-shirt, the Abstract Product, that is available in the sizes small, medium, and large, three different Product Variants. The Abstract Product “T-shirt” appears as a search result. On the product detail page the customer can select between the product variants small, medium, large and put it into the cart.

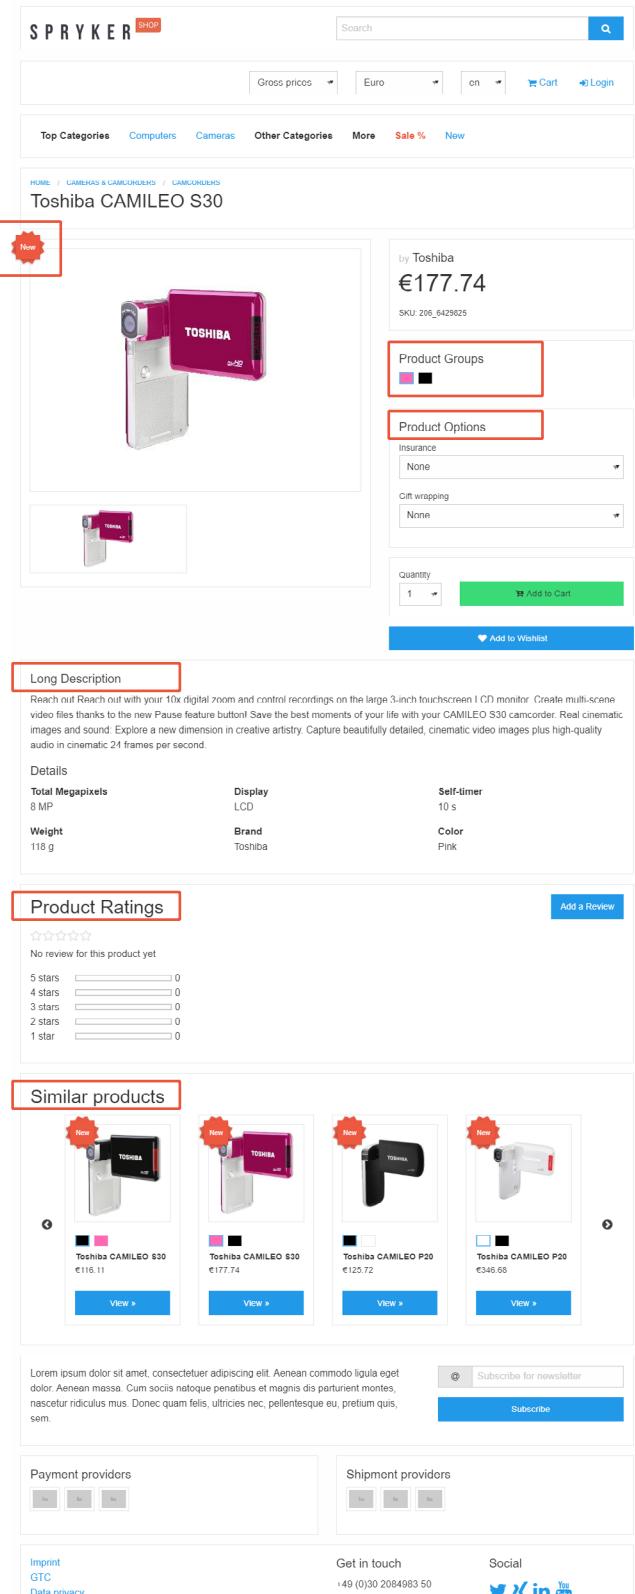

## Product Bundles

With the Product Bundles feature you can freely tie individual items together and sell them as a package. As opposed to a set, in which products are loosely grouped, the items in a bundle are always sold together. You can choose to create a special bundle price to make the purchase more attractive. Since each bundle's product is still handled like an individual item in the Order Management Process, bundle availability is always calculated and displayed based on the item with the smallest available stock to avoid overselling.

This screenshot shows the Spryker Admin interface for managing a product abstract. The left sidebar navigation includes sections for Sales, Customers, Category, Content Management, Glossary, Products (selected), Availability, Products, Attributes, Product Labels, Product Options, Product Relations, Product Reviews, and Product Sets. The main content area displays the 'View Product Abstract: 206' page. Key sections include:

- General Information:** Shows Store relation (OK), SKU Type (206 Product), and Language dropdowns for en\_US and de\_DE.
- Description:** Contains a detailed product description: "Reach out! Reach out with your 10x digital zoom and control recordings on the large 3-inch touchscreen LCD monitor. Create multi-scene video files thanks to the new Pause feature button! Save the best moments of your life with your CAMILEO S30 camcorder. Real cinematic images and sound. Explore a new dimension in creative artistry. Capture beautifully detailed, cinematic video images plus high-quality audio in cinematic 24 frames per second."
- Price & Taxes:** Lists prices for various currencies: Net price (DEFAULT): €119,97; Gross price (DEFAULT): €177,74; Net price (DEFAULT): €103,97; Gross price (DEFAULT): €204,40; Net price (DEFAULT): €142,19; Gross price (DEFAULT): €142,19; Net price (DEFAULT): €147,18; Gross price (DEFAULT): €163,57.
- Attributes:** Lists product attributes: total\_megapixels (8 MP), display (LCD), self\_timer (10 s), weight (118 g), and brand (Toshiba).
- SEO (Meta Information):** Lists meta descriptions for en\_US and de\_DE.
- Image Sets:** Shows a default image set for the product.
- Variants:** Displays a table with one entry: Product ID 206, Sku 206\_6429625, Name Toshiba CAMILEO S30, Status Active, Is bundle No, Actions (View, Edit, Manage Attributes).
- Product Groups:** Shows two entries: Product Group ID 57, Product ID 205, Name Toshiba CAMILEO S30, Sku 205, Status Active, Actions (View, Edit); and Product Group ID 57, Product ID 206, Name Toshiba CAMILEO S30, Sku 206, Status Active, Actions (View, Edit).
- CMS Block list:** Shows 'No records'.

This screenshot shows the Spryker Shop product detail page for the Toshiba CAMILEO S30. The top navigation includes 'Top Categories' (Computers, Cameras, Other Categories), 'More', 'Sale %', and 'New'. The main product information is as follows:

- By:** Toshiba
- SKU:** 206\_6429625
- €177,74**
- Product Groups:** Pink, Black
- Product Options:** Insurance (None), Gift wrapping (None)
- Quantity:** 1
- Add to Cart** button
- Add to Wishlist** button

The product description is identical to the one in the Admin interface. Below the description, there are sections for Details, Product Ratings, and Similar products.

**Details:** Total Megapixels (8 MP), Display (LCD), Weight (118 g), Brand (Toshiba), Self-timer (10 s), Color (Pink).

**Product Ratings:** A section for adding reviews, showing a 5-star rating scale with 0 reviews.

**Similar products:** Four related products are listed: Toshiba CAMILEO S30 (€116.11), Toshiba CAMILEO S30 (€177.74), Toshiba CAMILEO P20 (€125.72), and Toshiba CAMILEO P20 (€346.68). Each product has a 'View' button.

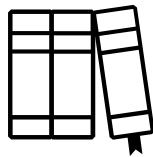

**Payment providers:** Shows three placeholder icons for payment methods.

**Shipment providers:** Shows three placeholder icons for shipping methods.

**Imprint GTC Data privacy:** Links to legal documents.

**Get in touch:** Contact information: +49 (0)30 2084983 50, info@spryker.com

**Social:** Icons for Twitter, LinkedIn, YouTube, and Facebook.

# Catalog Management

Who

Category Manager

Marketing

Sales

End-Customer

....

## What

Pave the way for a smooth shopping journey with well-organized categories and organize and extend your catalog to match your business needs.

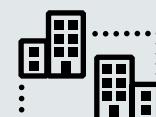

## Details

Build and organize a unique and clear catalog that meets your customers' demands and allows them to find what they are looking for quickly.

Assign attributes to your products and organize them in a custom category tree. Easily manage stock levels and pricing. Create and edit product pages and effortlessly manage translations and SEO.

With the powerful Category Management features you can easily build a custom category strategy which allows you to manage your category pages, create dynamic category pages and include category filters. To keep your catalog dynamic you can include autogenerated pages based on categories and create templates for these dynamic pages. This allows you to flexibly grow your product range and keep your catalog updated easily.

B2C

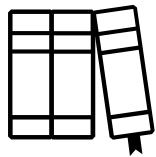

## Features

Category Management

Product to Category Association

Product Catalog Management

Define Category Hierarchy

# Catalog Management

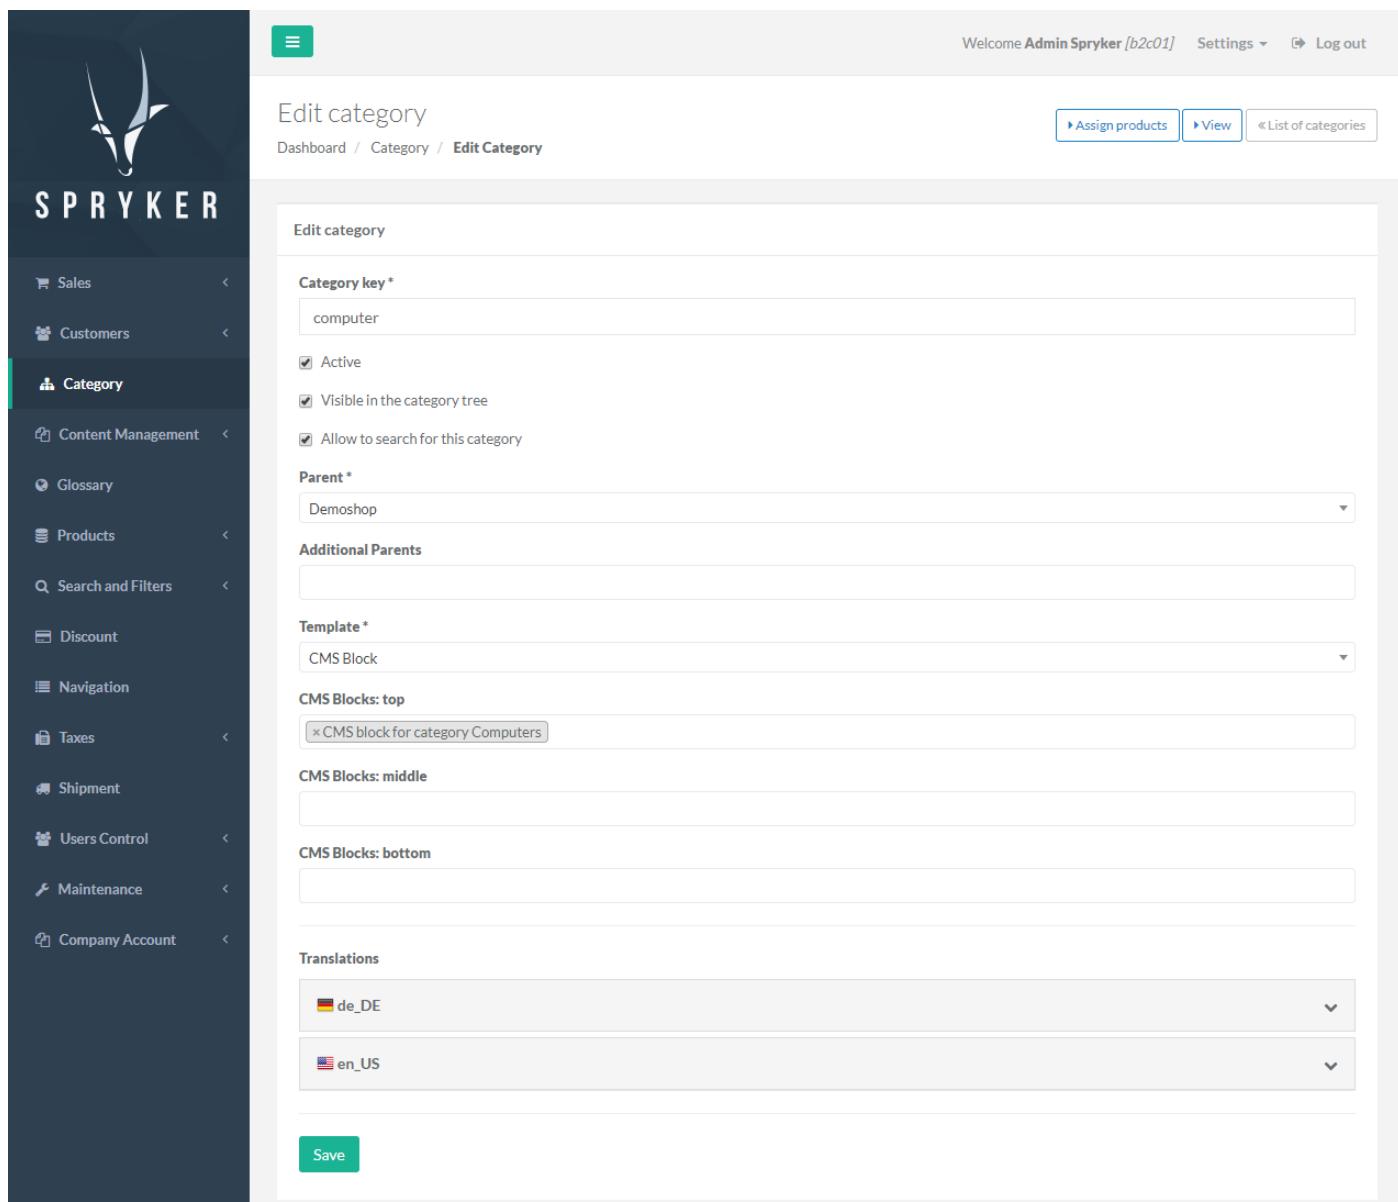

## Features

### Category Management

Manage your product catalog with customized categories, category pages and filters to easily handle and sort your items.

All products can be categorized into logical clusters, so that your customers can filter them in your shop. Easily define if categories should be searchable or hidden and thus will or will not appear in your shop or search.

You can add customizable category pages to your shop by using different CMS Block templates in order to build i.e. marketing relevant landing pages or mimic a category drill down experience.

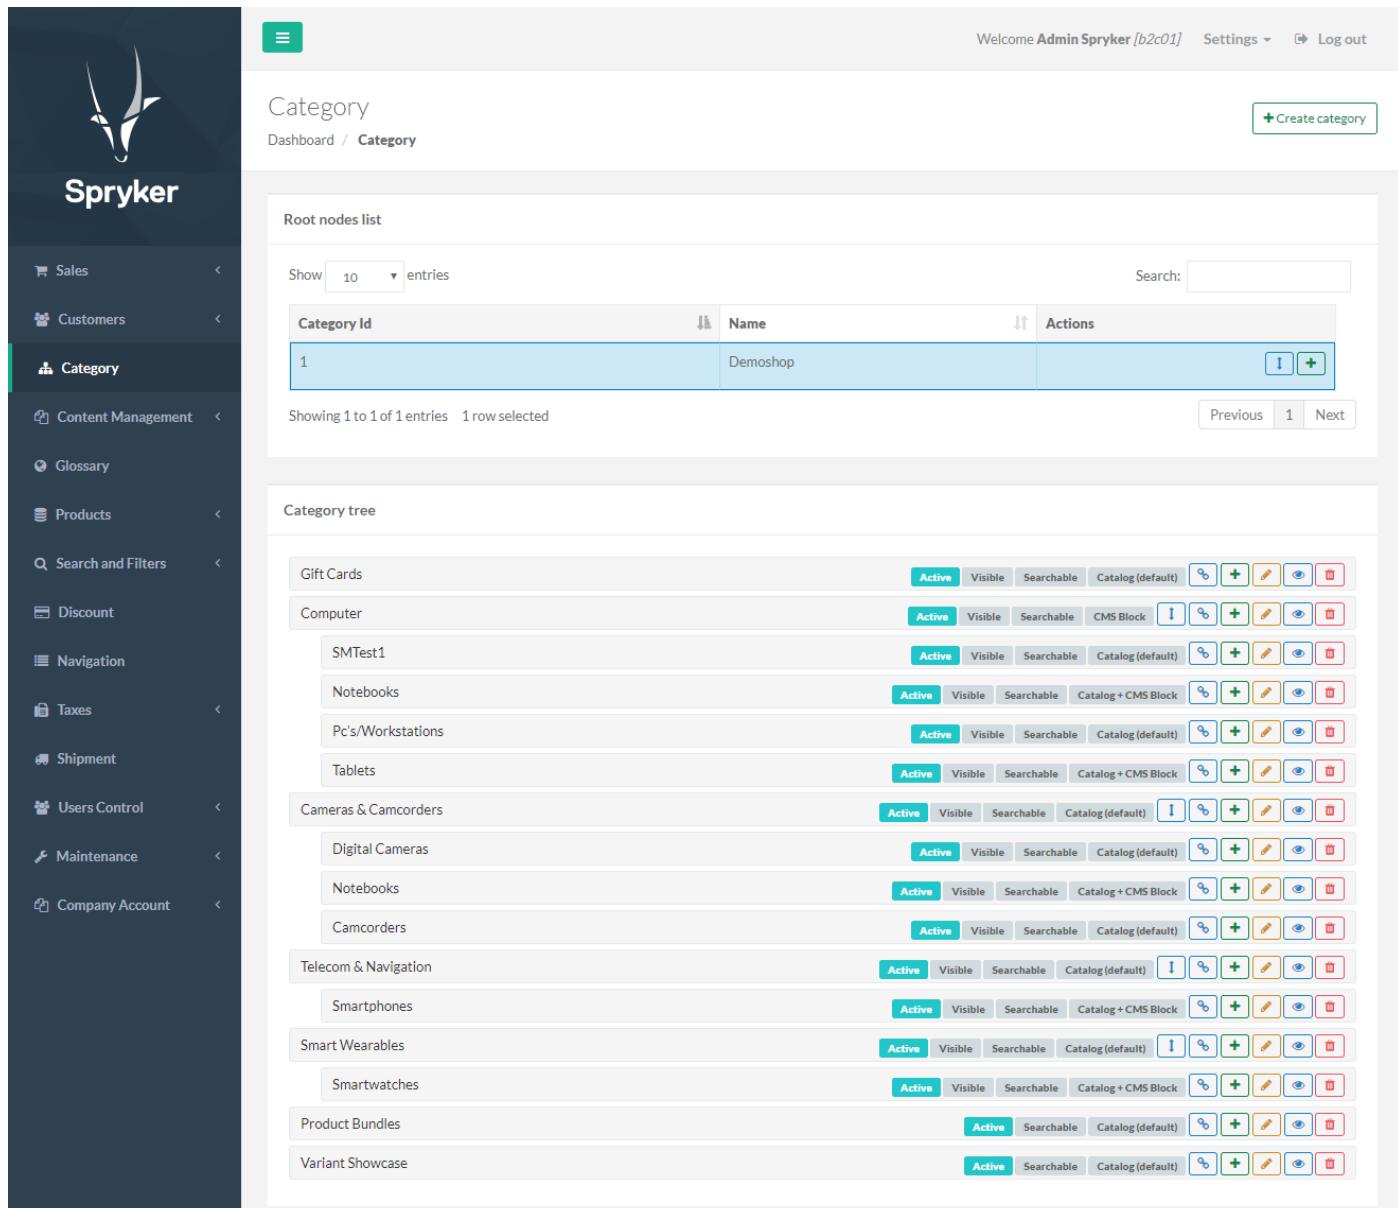

The screenshot shows the Spryker Admin interface for editing a category. The left sidebar has a dark theme with the Spryker logo and navigation links like Sales, Customers, Category (which is selected), Content Management, Glossary, Products, Search and Filters, Discount, Navigation, Taxes, Shipment, Users Control, Maintenance, and Company Account. The main content area has a light background. At the top, it says "Edit category" and shows the breadcrumb "Dashboard / Category / Edit Category". On the right, there are three buttons: "Assign products", "View", and "List of categories". The form fields include:

- Category key \***: computer
- Active**: checked
- Visible in the category tree**: checked
- Allow to search for this category**: checked
- Parent \***: Demoshop
- Additional Parents**: (empty input field)
- Template \***: CMS Block
- CMS Blocks: top**: CMS block for category Computers
- CMS Blocks: middle**: (empty input field)
- CMS Blocks: bottom**: (empty input field)
- Translations**: de\_DE, en\_US

At the bottom is a green "Save" button.

## Define Category Hierarchy

With the easy-to-use Category Tree function, you can create a nested category structure, which allows you to build a Hierarchy. Use the nested categories in your shop to create a seamless navigation and guide your customers through your shop.

The screenshot shows the Spryker Admin interface for Category Management. On the left, a sidebar menu includes Sales, Customers, Category (selected), Content Management, Glossary, Products, Search and Filters, Discount, Navigation, Taxes, Shipment, Users Control, Maintenance, and Company Account. The main content area has two sections: 'Root nodes list' and 'Category tree'. The 'Root nodes list' table shows one entry: Category Id 1, Name Demoshop, with edit (+) and delete (-) icons. The 'Category tree' section shows a hierarchical structure under 'Gift Cards': Computer (SMTTest1, Notebooks, Pc's/Workstations, Tablets), Cameras & Camcorders (Digital Cameras, Notebooks, Camcorders), Telecom & Navigation (Smartphones, Smart Wearables, Smartwatches), Product Bundles, and Variant Showcase. Each category item in the tree has Active, Visible, Searchable, Catalog (default), and CMS Block status indicators, along with edit (+) and delete (-) icons.

## Product Catalog Management

Building a Product Catalog is more than just creating a list of the products you sell. To make items appealing for your customers they need to be enriched with descriptions and images, pricing details and product options. This information also makes filtering and categorizing easier and your customers find what they need quicker.

images, pricing details and product options. This information also makes filtering and categorizing easier and your customers find what they need quicker.

## Product to Category Association

You can manually assign products to a category or simply import product-category associations from external sources. Each product can be listed in different categories and the same category can appear multiple times in the category tree.

**Assign products to category**

# Navigation

Who

E-Commerce Manager

Marketing

....

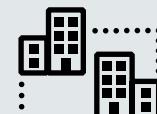

What

An optimized store navigation can efficiently lower your bounce rate.

Details

Enable shoppers to quickly navigate to the products they desire and help search engines index your product information effectively. Build an easy-to-use navigational structure with a custom category tree and an unlimited number of navigation menus. The Administration Interface lets you add navigational elements such as CMS and category pages, internal links or external backlinks to partners or social media. Include breadcrumbs to spotlight a user's path. Plan ahead and schedule the visibility and navigation of promotional content.

B2B

B2C

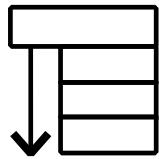

....

Features

Hierarchical Navigation

Product Based Shop Navigation

Content Based Shop Navigation

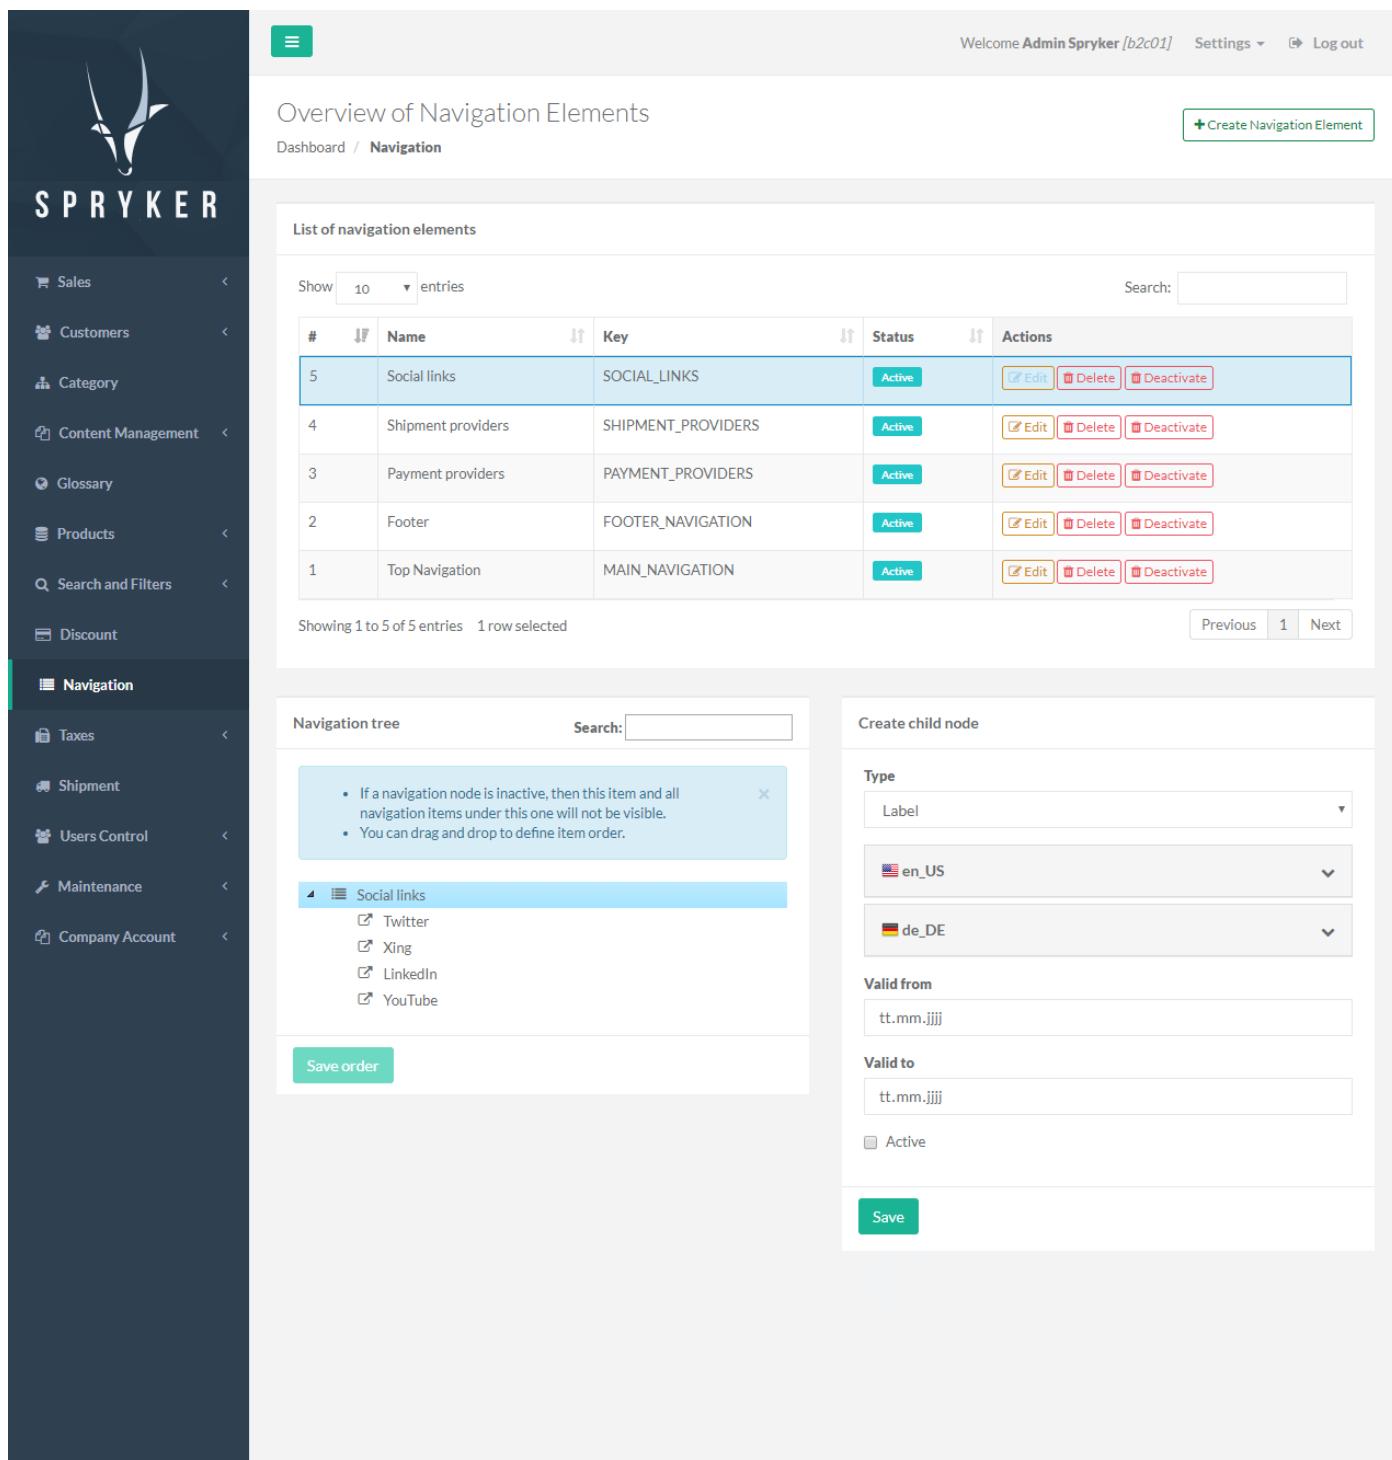

# Navigation Features

## Hierarchical Navigation

The Spryker Commerce OS Navigation is built in a tree structure to support multiple levels of linking, e.g. to categories, external links, search results and CMS pages.

Breadcrumbs help your customers navigate through your shop more easily by highlighting the path to the page they are on. They appear on product details, catalog and checkout pages.

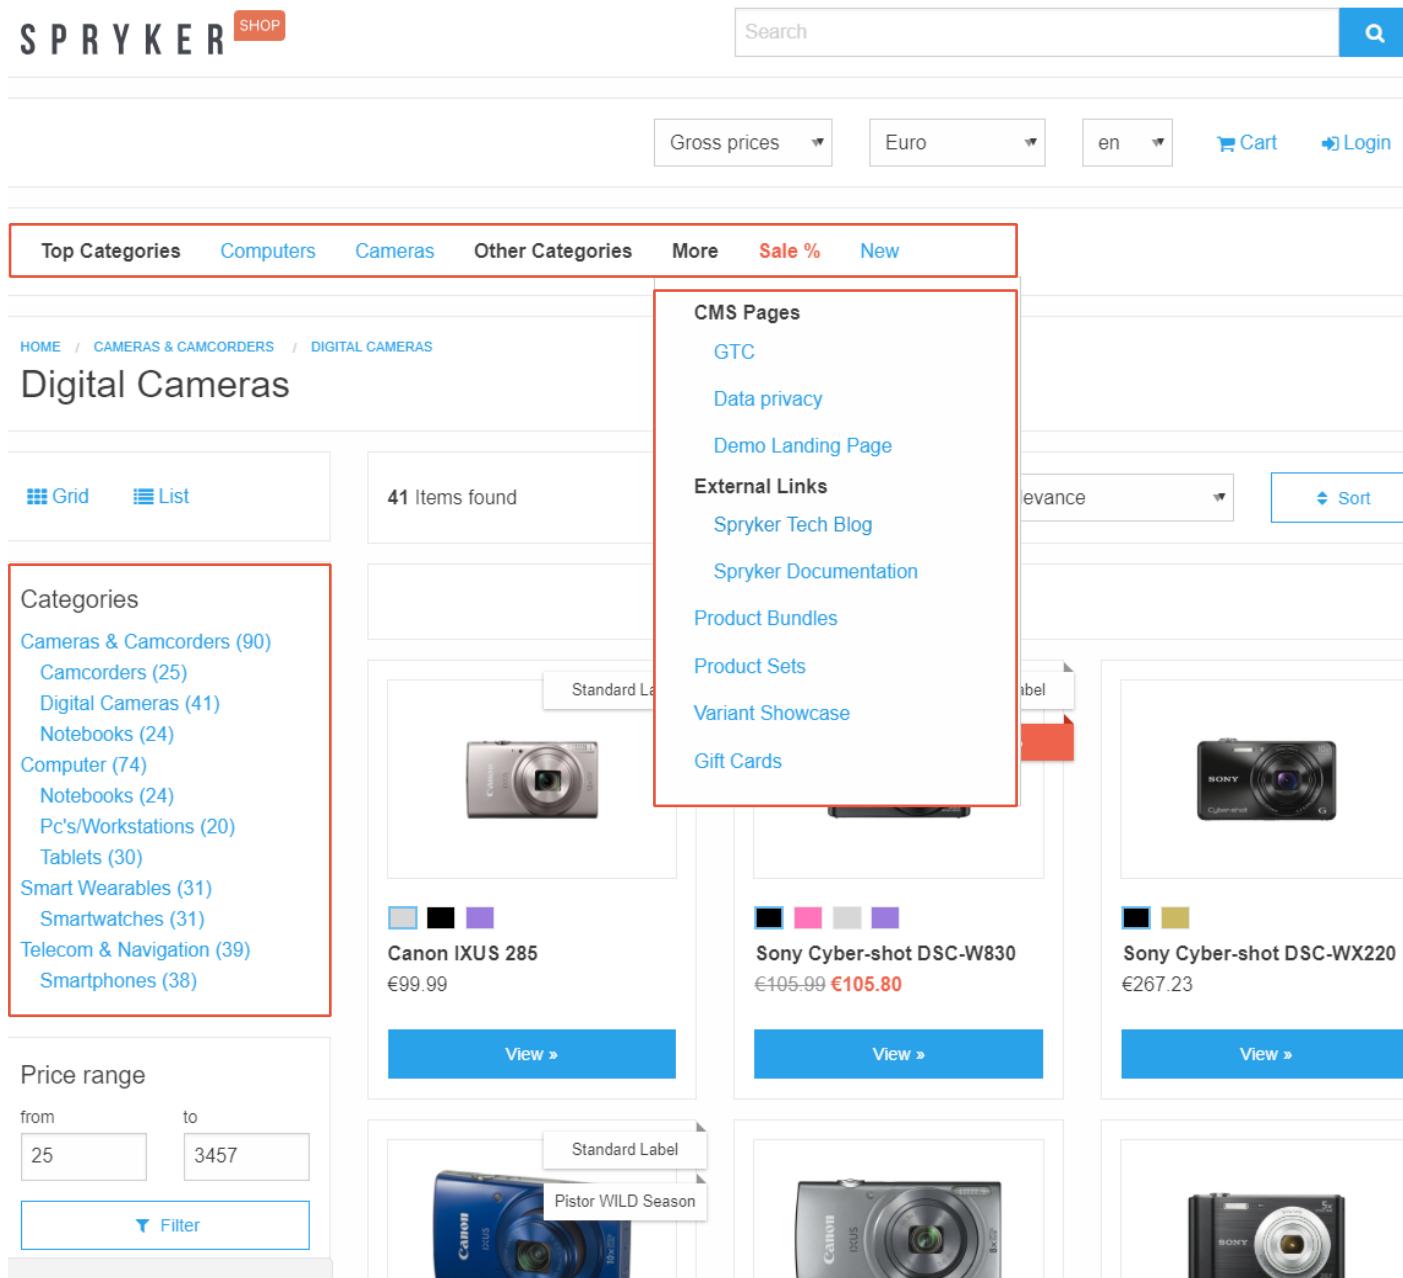

The screenshot displays the Spryker Commerce OS Admin interface. On the left, a dark sidebar lists various management modules: Sales, Customers, Category, Content Management, Glossary, Products, Search and Filters, and Discount. Under the 'Navigation' module, there are sub-options: Taxes, Shipment, Users Control, Maintenance, and Company Account. The main content area shows an 'Overview of Navigation Elements' with a table listing five navigation elements:

#	Name	Key	Status	Actions
5	Social links	SOCIAL_LINKS	Active	<a href="#">Edit</a> <a href="#">Delete</a> <a href="#">Deactivate</a>
4	Shipment providers	SHIPMENT_PROVIDERS	Active	<a href="#">Edit</a> <a href="#">Delete</a> <a href="#">Deactivate</a>
3	Payment providers	PAYMENT_PROVIDERS	Active	<a href="#">Edit</a> <a href="#">Delete</a> <a href="#">Deactivate</a>
2	Footer	FOOTER_NAVIGATION	Active	<a href="#">Edit</a> <a href="#">Delete</a> <a href="#">Deactivate</a>
1	Top Navigation	MAIN_NAVIGATION	Active	<a href="#">Edit</a> <a href="#">Delete</a> <a href="#">Deactivate</a>

Below the table, a message indicates "Showing 1 to 5 of 5 entries 1 row selected". To the right, a "Create child node" form is open, showing fields for Type (set to Label), Language (en\_US and de\_DE), Valid from (tt.mm.jjjj), Valid to (tt.mm.jjjj), and Active status. A "Save" button is at the bottom of the form.

## Content Based Shop Navigation

Guide your customers through your shop not only via Product Categories, but also by providing creative Content Pages. These pages can also be part of your shop navigation to create a more vivid and inspirational shopping experience.

The screenshot shows a Spryker storefront interface. At the top, there is a navigation bar with links for 'Top Categories', 'Computers', 'Cameras', 'Other Categories', 'More', 'Sale %', and 'New'. Below this is a search bar and language selection ('en'). On the left, there is a sidebar with 'Categories' (including 'Cameras & Camcorders (90)', 'Camcorders (25)', 'Digital Cameras (41)', etc.) and a 'Price range' filter ('from 25 to 3457'). The main content area shows a grid of digital cameras. One camera, the Canon IXUS 285, is highlighted with a red box. A tooltip for this camera displays 'Standard Label' and 'Pistor WILD Season'. To the right of the camera grid, a sidebar is open, containing sections for 'CMS Pages' (GTC, Data privacy, Demo Landing Page) and 'External Links' (Spryker Tech Blog, Spryker Documentation). There are also links for 'Product Bundles', 'Product Sets', 'Variant Showcase', and 'Gift Cards'.

## Product Based Shop Navigation

The Product Based Navigation can easily reflect any grouping of products you wish. Customize your store's Navigation in the Administration Interface and add, edit or delete elements.

- Build relationships to pages outside the store, to support SEO capabilities through backlinks for improved ranking, or special promotions.
- Easily set validity dates for your navigational elements for promotional or seasonal purposes.

# Cross-sell and Upsell

Who

Sales

Marketing

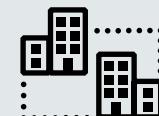

What

Increase the average order value through smart upselling and cross-selling.

Category Manager

Marketing

End-Customer

....

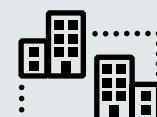

What

Increase conversion rates by providing an excellent search and filtering experience.

## Details

Let shoppers browse your catalog quickly with the highly flexible filter and search features. The out-of-the-box Elasticsearch technology allows you to include full-text search, autosuggestions and autocomplete. Further search features let you set individual search preferences for multiple stores, for example. Categorizing your products and adding dynamic filters and facets helps your customers to refine the search results further. In addition to the custom filters, you can also add more advanced filters that make use of the products' metadata, for example. Further features enable you to promote a brand's top-sellers or highly rated products.

Filters &amp; Search by Category

# Search & Filter Features

## Textual Search

By default, all content on CMS and Product Pages, such as product name, description text or allocated attributes, is searchable. Additionally, Product Attributes can be boosted in the search results.

You can easily define which products or content should be in- or excluded from full text search.

## Multi-Language Search

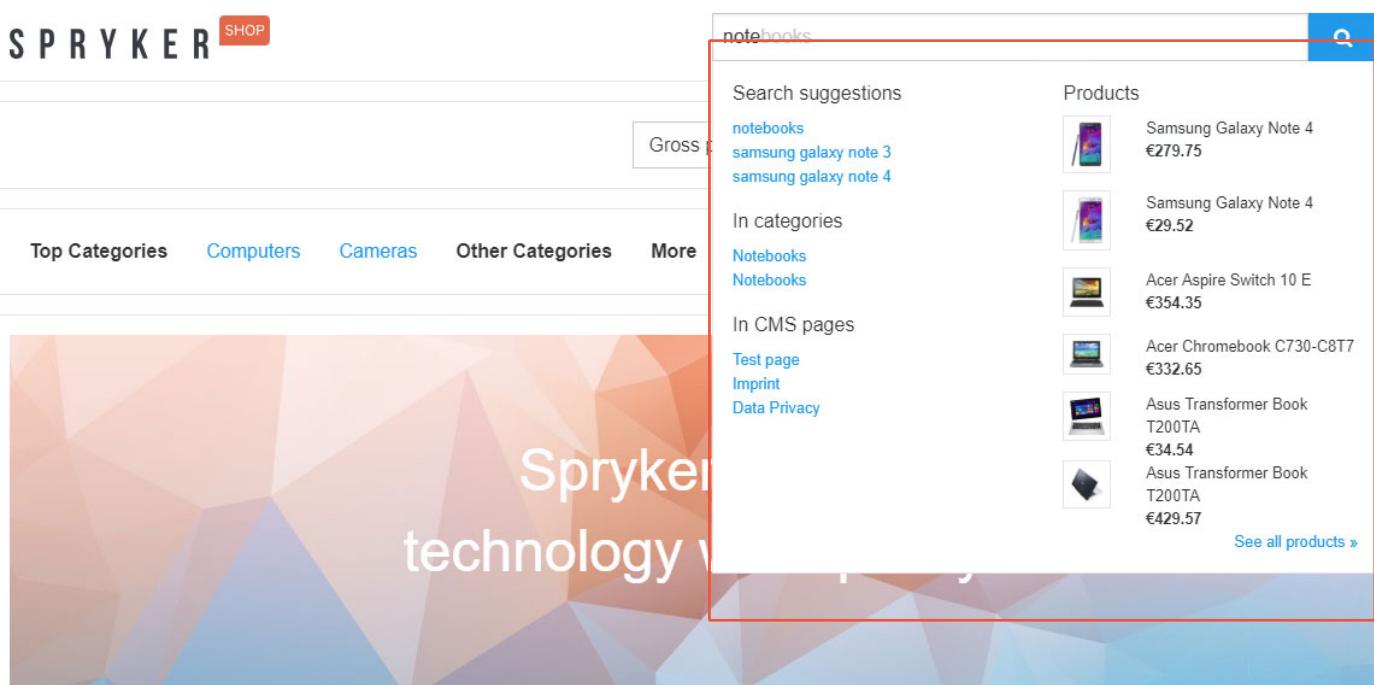

If you set up a multi-language store, the search function automatically checks and adjusts the language your customer has selected. All search functions, such as autocomplete or auto-suggest, are then applied to the selected language.

## Full-Site Search

Give your customers the opportunity to search all products, categories and CMS pages with powerful search functionalities.

Autocompletion helps customers by predicting the rest of a search string and offers a list of matching options. Furthermore, auto-suggest proposes on-the-fly page suggestions for products, categories or CMS Pages. The search also includes a “did you mean” suggestions plugin that offers typo corrections for the search string. Additionally, a fuzzy-search feature suggests search results that do not exactly match the search request.

Mimic a dynamic category by saving a search result and embedding it like a category page in your Navigation. You can also place any full text search result in CMS Pages or Blocks and thus add another content layer to your shop.

The screenshot shows the Spryker storefront with a search bar at the top containing the query "notebooks". The search results are displayed in a sidebar on the right, divided into sections: "Search suggestions", "In categories", and "In CMS pages". Under "Search suggestions", links are shown for "notebooks", "samsung galaxy note 3", and "samsung galaxy note 4". Under "In categories", links are shown for "Notebooks" and "Notebooks". Under "In CMS pages", links are shown for "Test page", "Imprint", and "Data Privacy". To the right of these sections, a "Products" section lists items such as the Samsung Galaxy Note 4, Acer Aspire Switch 10 E, Acer Chromebook C730-C8T7, Asus Transformer Book T200TA, and Asus Transformer Book T200TA. Each item is accompanied by a small image and its price. At the bottom of the sidebar, a link "See all products »" is visible.

Category	Item	Description
Search suggestions	notebooks	Samsung Galaxy Note 4 €279.75
	samsung galaxy note 3	Samsung Galaxy Note 4 €29.52
	samsung galaxy note 4	Acer Aspire Switch 10 E €354.35

## Standard Filters

The Spryker Commerce OS offers a variety of different filter types to ease the process of product discovery. These filters include single- or multi-select and range filters.

## Filters & Search by Category

To help your customers locate items in your shop more easily you can add customizable Category Filters to the catalog pages or simply fall back to the standard Category Filters. In

the Administration Interface you can add, rearrange and define filters for any given parameter in the category tree, such as price or brand.

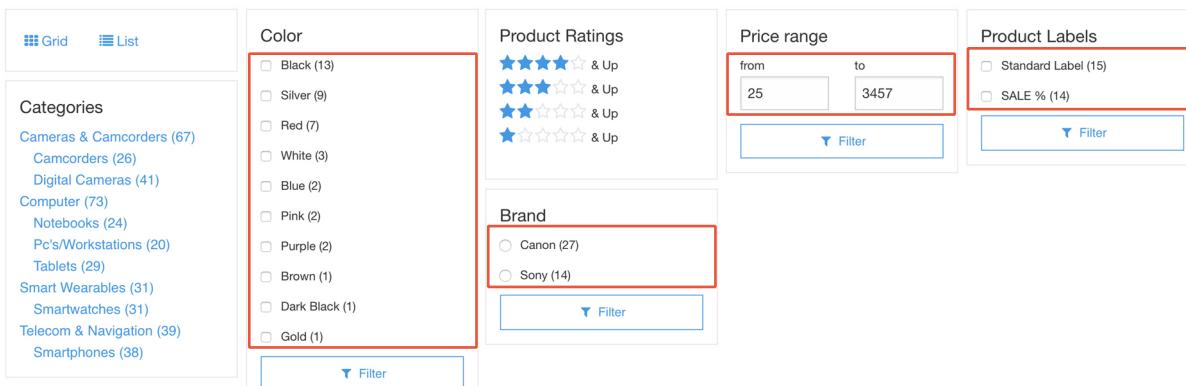

The screenshot shows the Spryker Admin interface. On the left is a sidebar with various menu items like Glossary, Products, Search and Filters (with sub-options for Category Filters, Search Preferences, and Filter Preferences), Discount, Navigation, Taxes, Shipment, Users Control, Maintenance, and Company Account. The main area has two panes. The left pane shows a 'Category tree' with categories like Demoshop, Computer, Cameras & Camcorders, Telecom & Navigation, Smart Wearables, etc. The right pane shows 'Category Filters for Notebooks'. It includes a note: 'There are no manual filter preferences defined for this category. The filters listed below are global settings. To define manual references for this category, modify the filters below.' Below this is an 'Add filter' field containing 'storage\_capacity' with an 'Add' button. A list of 'Active filters' follows, each with a red delete icon: category, price, label, rating, color, storage\_capacity, brand, touchscreen, and weight. A 'Save' button is at the bottom.

## Dynamic Filters & Facets

You can freely define facet filters for any Product Attribute.

The design, placement on page, quantity of filters, content and order by which they are listed in your shop are completely customizable.

Apart from the Standard Filters there are others that make use of a product's metadata to create additional and more advanced filter options. An example hereof is the ""New"" Product Indication that allows you to display items that were added to your catalog recently.

The screenshot shows the Spryker storefront with several dynamic filters. On the left is a sidebar with 'Grid' and 'List' options, followed by 'Categories' and a list of product categories. The main area has four filter boxes. The first box, 'Color', contains checkboxes for Black (13), Silver (9), Red (7), White (3), Blue (2), Pink (2), Purple (2), Brown (1), Dark Black (1), and Gold (1). The second box, 'Product Ratings', shows five star rating icons with the text '& Up' next to them. The third box, 'Price range', has input fields for 'from' (25) and 'to' (3457) with a 'Filter' button. The fourth box, 'Product Labels', contains checkboxes for 'Standard Label (15)' and 'SALE % (14)', with a 'Filter' button. All these filter boxes are highlighted with a red border.

# SEO Features

## Landing Pages

Create Landing Pages for Marketing campaigns, Product Promotions, Categories or other purposes and add SEO relevant information to boost search ranking.

## URL Redirects

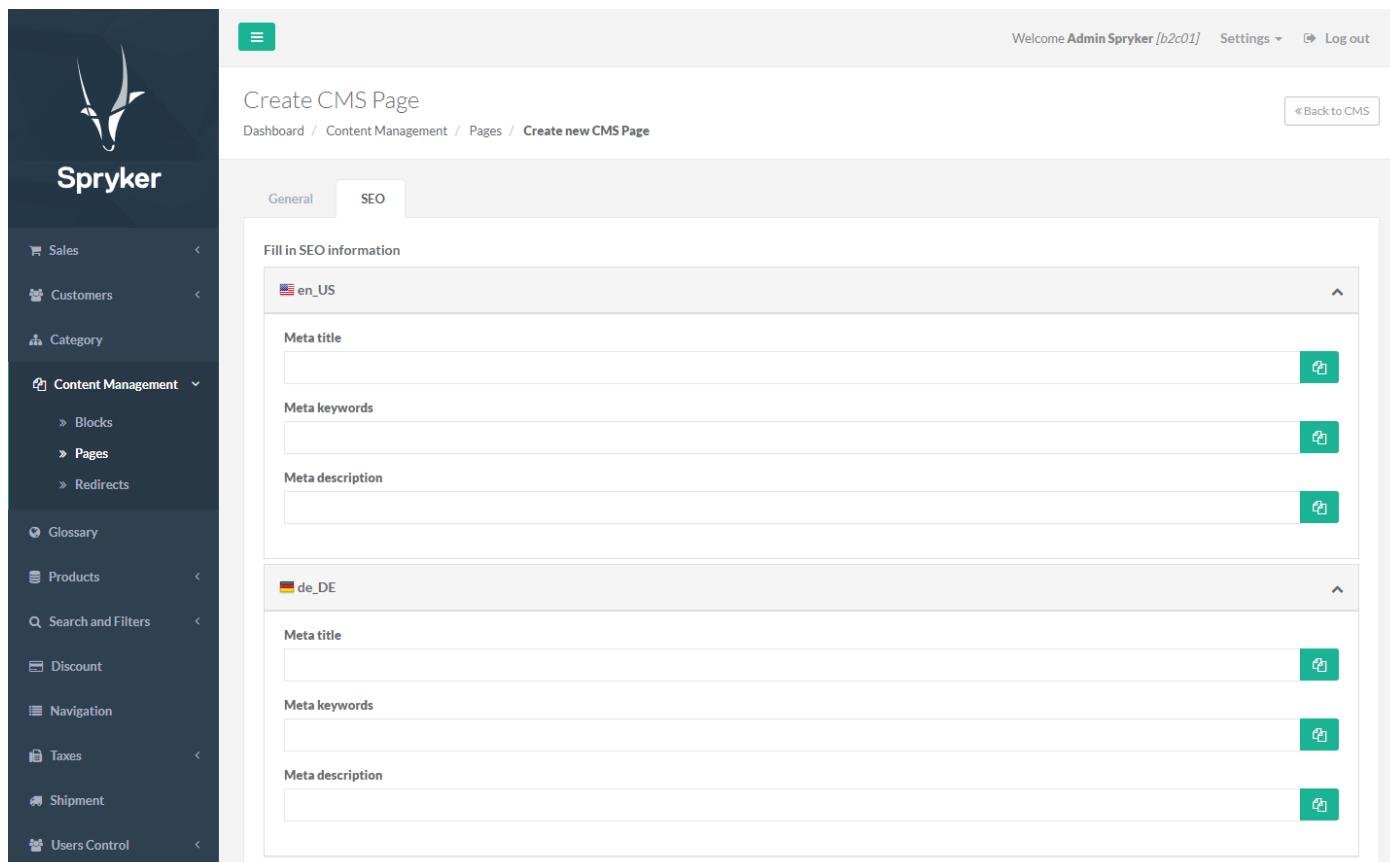

With URL Redirects you can create content redirects and increase your store's search engine visibility. Redirects can be store-internal or to an external site and can reflect various HTTP status codes. The status code plays a major role for search engine ranking.

## Friendly URLs

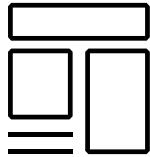

Create SEO friendly URLs per page to increase your online shop's credibility and search engine ranking.

## Meta Tags

Add textual meta information to CMS content such as titles, keywords and descriptions to boost SEO ranking. All meta information can be translated into your specified languages.

The screenshot shows the Spryker CMS interface for creating a new CMS page. The left sidebar includes links for Sales, Customers, Category, Content Management (Blocks, Pages, Redirects), Glossary, Products, Search and Filters, Discount, Navigation, Taxes, Shipment, and Users Control. The main header shows 'Welcome Admin Spryker /b2c01' and 'Log out'. The current page is 'Create CMS Page' under 'Content Management / Pages / Create new CMS Page'. The 'SEO' tab is selected. The interface allows filling in SEO information for two language variants: 'en\_US' and 'de\_DE'. For each language, there are fields for 'Meta title', 'Meta keywords', and 'Meta description', each with a small green icon for translation.

## CMS Blocks

Embed custom CMS Blocks into your shop to show any information you want to highlight. You can easily add promotional banners and define validity date ranges to emphasize specific, time limited content. Use placeholders to display single products, product groups and sets in CMS Blocks.

If you have an international store set-up, you can define which CMS Blocks appear in which stores. Specify exact to and from dates to make CMS Blocks publicly available within a defined validity period.

The screenshot shows the 'Overview of CMS Blocks' page in the Spryker admin interface. The left sidebar has a dark theme with the Spryker logo at the top. Under 'Content Management', 'Blocks' is selected. The main area has a light background with a header 'Overview of CMS Blocks' and a breadcrumb 'Dashboard / Content Management / Blocks'. A green button '+ Create block' is in the top right. Below is a table titled 'List of CMS blocks' with the following columns: Block Id, Name, Template, Status, Stores, and Actions. The table lists seven blocks:

Block Id	Name	Template	Status	Stores	Actions
7	This is my new block	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>
6	CMS block for category Computers	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>
5	Category CMS page showcase for Bottom position	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>
4	Category CMS page showcase for Middle position	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>
3	Category CMS page showcase for Top position	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>
2	Product SEO content	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>
1	Teaser for home page	Title and description block	Active	DE AT US	<a href="#">View Block</a> <a href="#">Edit Placeholder</a> <a href="#">Edit Block</a> <a href="#">Deactivate</a>

At the bottom, it says 'Showing 1 to 7 of 7 entries' and has navigation buttons 'Previous' (disabled), '1', and 'Next'.

## Publish to Live

Once your CMS Page or Block content is final you can publish it to your shop website with a single click.

## Page Versioning

In the Version History you can see and compare all published versions of a CMS Page and quickly roll back to an earlier version with a simple click.

## Costumizable CMS Templates

Templates are the go-to solution if you want to emphasize your store branding. They can be assigned to all CMS Pages, to standardize and support your store branding. CMS Blocks can easily be pre-defined, to alleviate work flows.

## WYSIWYG Editor

With the intuitive, user-friendly WYSIWYG-editor you can create and edit content as well as dynamically embed product information and media, such as videos, pictures or any other.

## Time Restricted Content Page Publishing

seasonal sales or event related pages.

## CMS Page Drafts & Previews

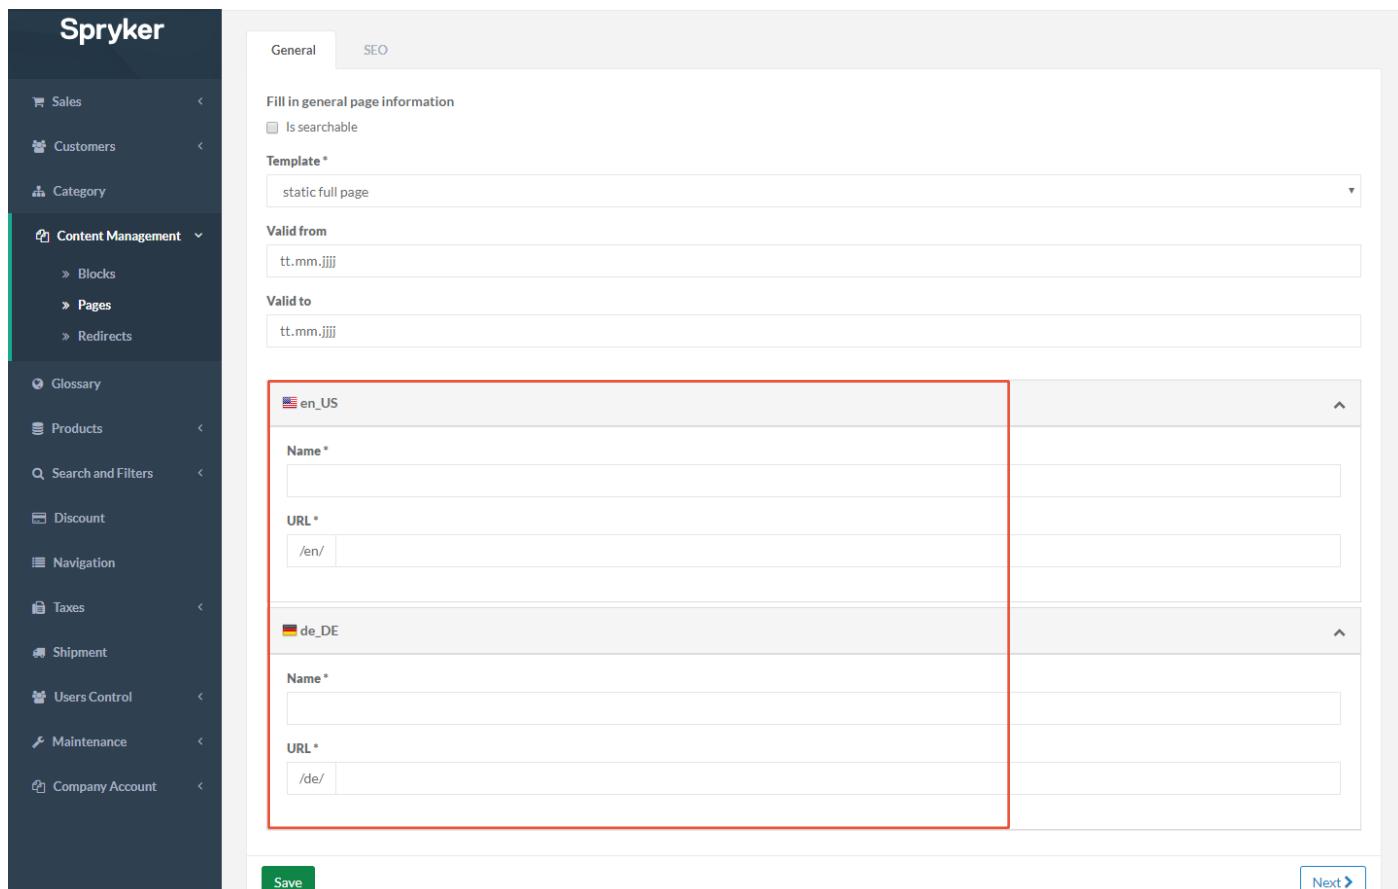

Specify exact validity dates to make CMS Pages publicly available within a defined time period. This feature is ideal for limited promotions,

## Content Search Widget

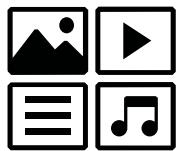

will appear as auto-suggest flyouts below the search box.

## Multi Store Content Translations

All textual elements can be created in various languages to support content creation for multiple language set-ups, e.g. for your international stores.

The screenshot shows the Spryker CMS interface for managing content. On the left, there's a sidebar with navigation links like Sales, Customers, Category, Content Management (which is currently selected), Glossary, Products, Search and Filters, Discount, Navigation, Taxes, Shipment, Users Control, Maintenance, and Company Account. The main area has tabs for General and SEO. Under General, there are fields for 'Is searchable' (unchecked), 'Template \*' (set to 'static full page'), and date ranges 'Valid from' and 'Valid to' both set to 'tt.mm.jjjj'. Below these, there are two sections for content translation: 'en\_US' and 'de\_DE'. Each section has 'Name \*' and 'URL \*' fields. The 'en\_US' section has 'Name \*' with a placeholder and 'URL \*' with '/en/'. The 'de\_DE' section has 'Name \*' with a placeholder and 'URL \*' with '/de/'. A red box highlights these two sections. At the bottom, there are 'Save' and 'Next >' buttons.

Asset Management

# Media Management

## Features

### Image Hosting

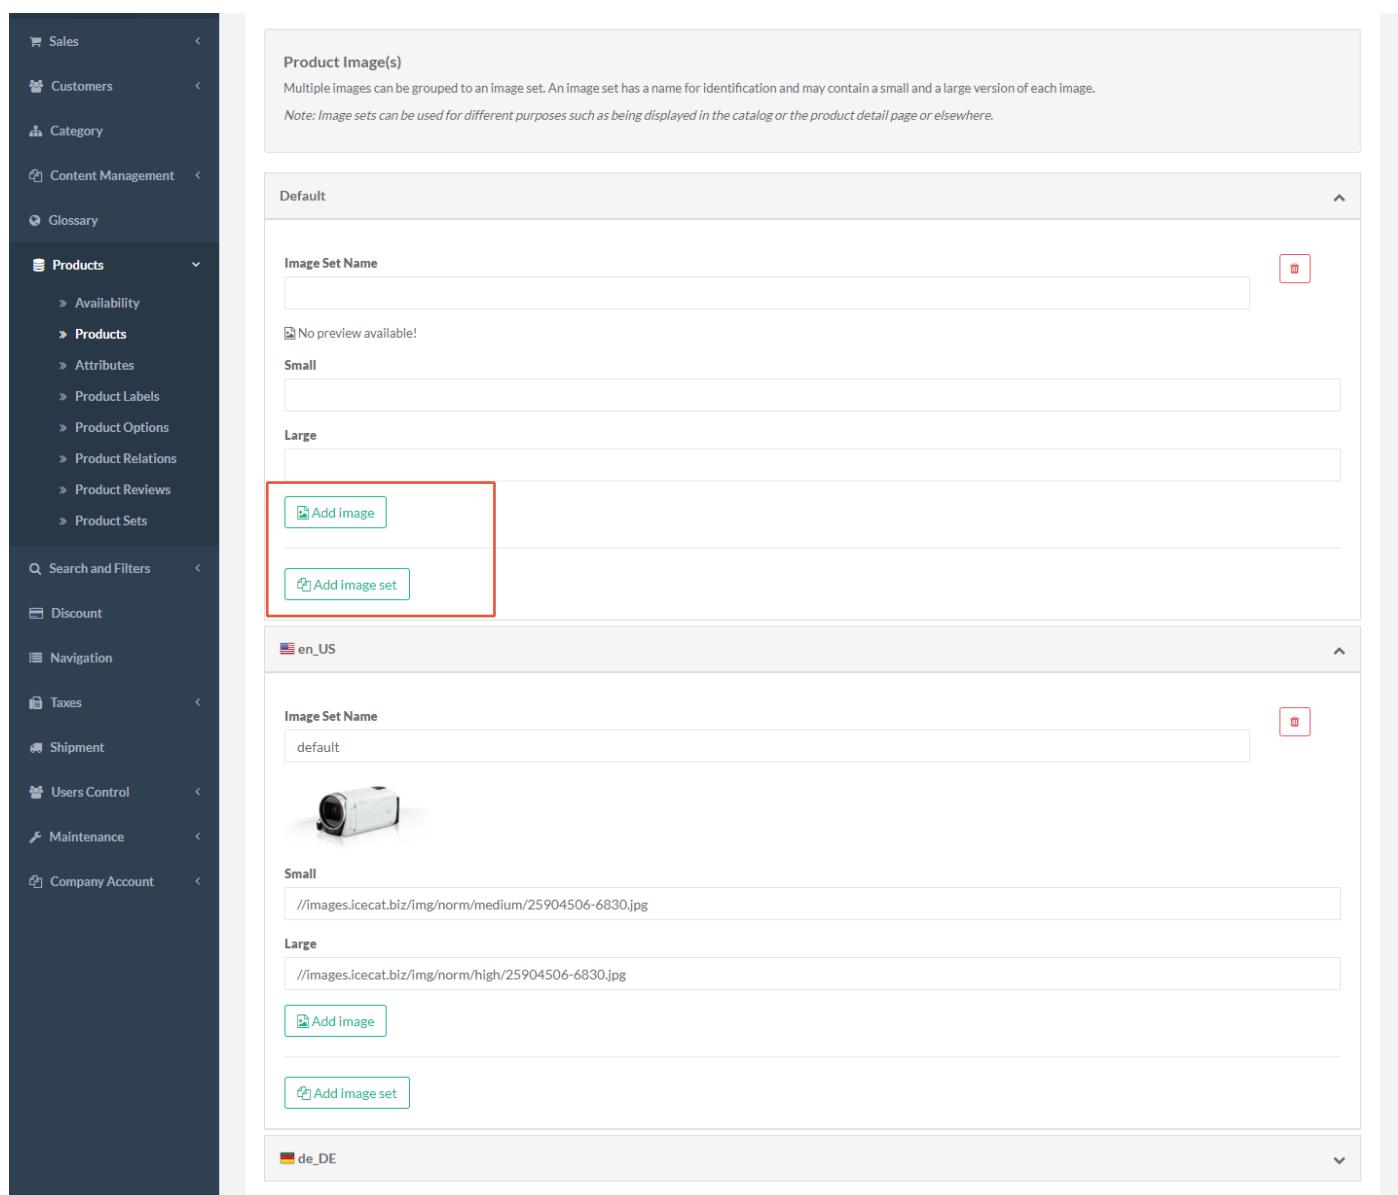

A high performance and fast site speed is essential to guarantee customer satisfaction. The Spryker Commerce OS ensures this by integrating images from separate hosting servers.

### Product Image Management

Make your shop more appealing and give your customers a better idea of what they are buying with Images and Image Sets. Group several images into sets and link them to products.

One product can have several named and localized sets of images, for example to present standard or seasonal highlights.

Different image sets can be used in CMS Pages and Blocks, for marketing and promotional purposes or simply to increase branding in your store.

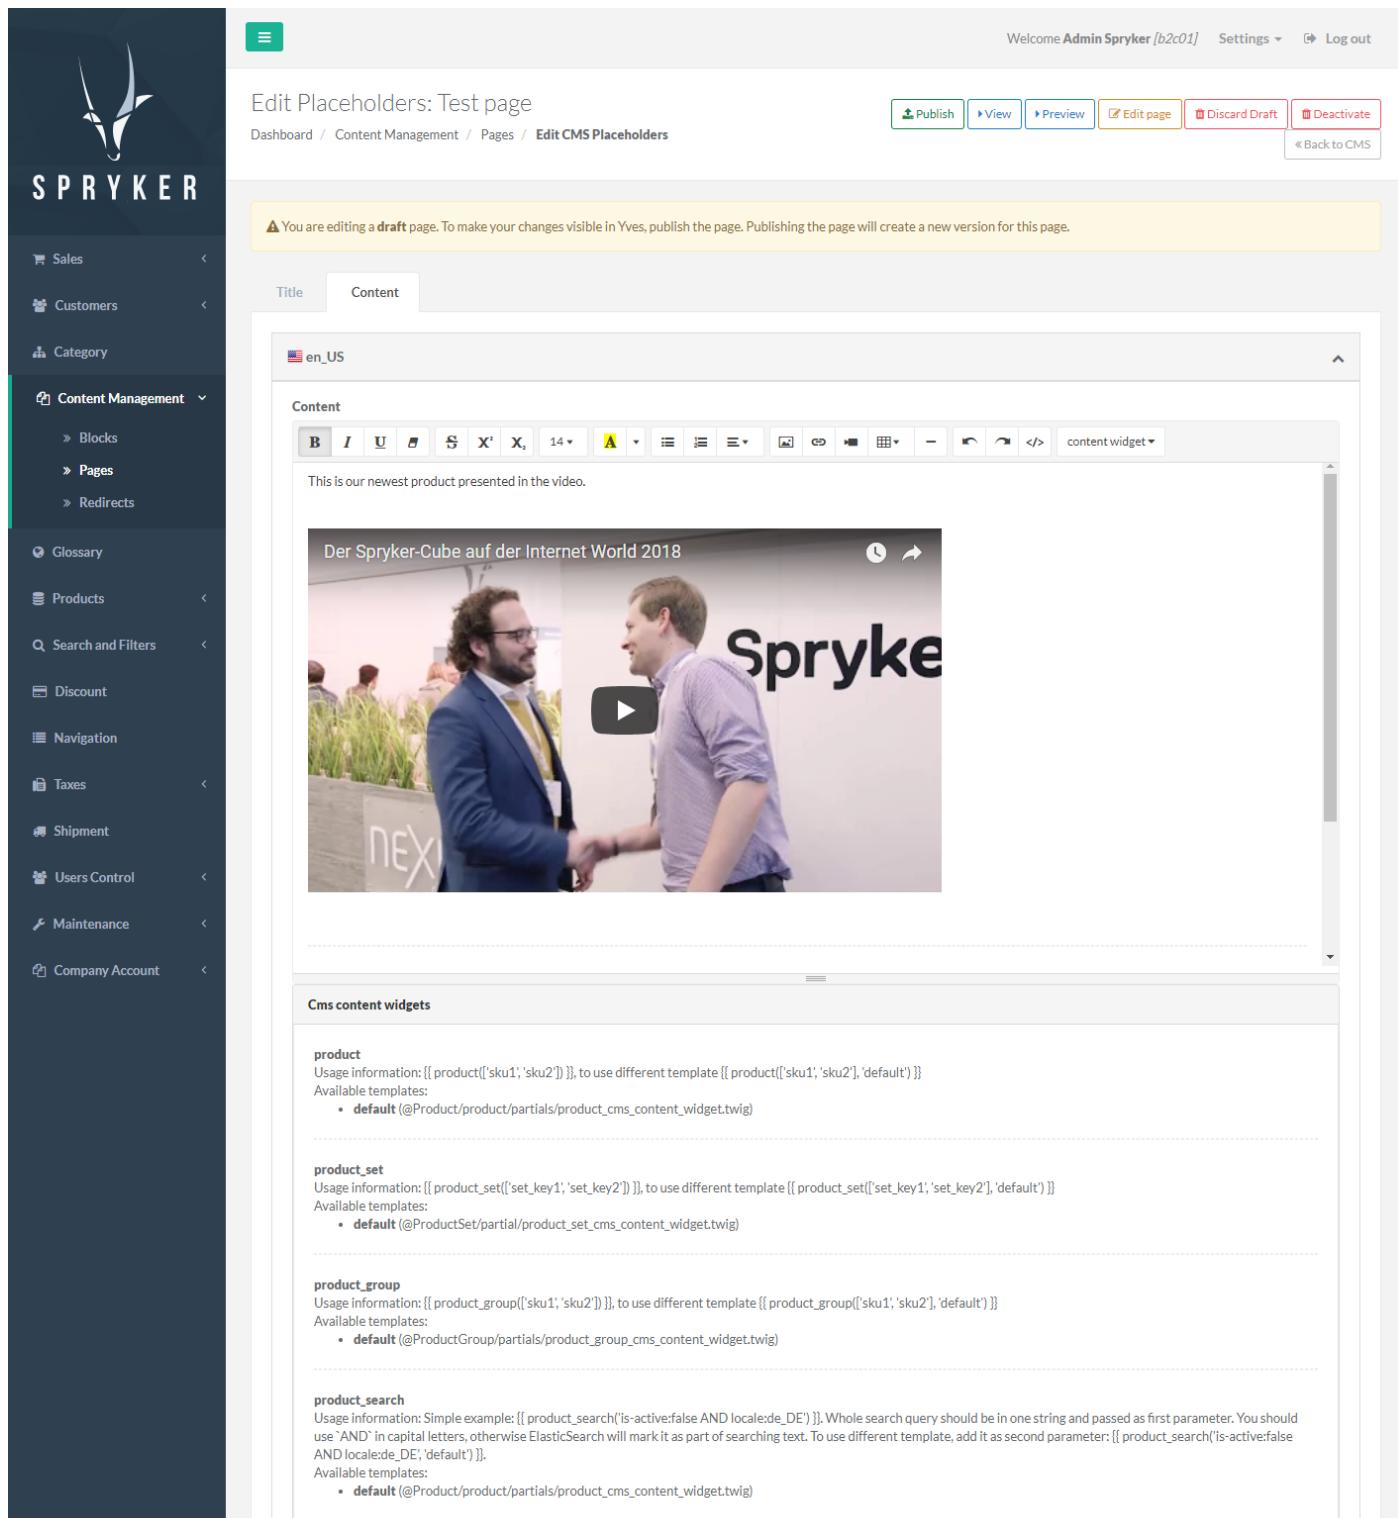

The screenshot shows the Spryker Commerce OS interface for managing product images. On the left, a dark sidebar lists various modules: Sales, Customers, Category, Content Management, Glossary, Products (with sub-options like Availability, Products, Attributes, etc.), Search and Filters, Discount, Navigation, Taxes, Shipment, Users Control, Maintenance, and Company Account. The main content area is titled "Product Image(s)" and contains instructions about image sets. It shows a "Default" section with fields for "Image Set Name" (containing "Small" and "Large" sections) and "en\_US" and "de\_DE" sections. Each section has an "Add image" button and an "Add image set" button. A red box highlights the "Add image set" buttons in both the Default and en\_US sections. The "en\_US" section also displays a thumbnail of a camera.

## Asset Management

Apart from images, you can also add a great variety of other assets to your shop, like presentations, pdf documents, graphics, banners and many more. This gives you the chance to create rich, compelling and attractive content for your customers.

## Video Embedding

Enrich your content by embedding Videos into CMS Blocks and Pages. Like Images and Assets, Videos need to be hosted on a separate platform to ensure high site speed.

The screenshot shows the Spryker CMS Placeholder editor interface. On the left is a dark sidebar with the Spryker logo and navigation links for Sales, Customers, Category, Content Management (selected), Glossary, Products, Search and Filters, Discount, Navigation, Taxes, Shipment, Users Control, Maintenance, and Company Account. The main area has a header with 'Welcome Admin Spryker [b2c01]' and 'Log out'. Below the header are buttons for Publish, View, Preview, Edit page (highlighted in orange), Discard Draft, and Deactivate. A message box says '⚠ You are editing a draft page. To make your changes visible in Yves, publish the page. Publishing the page will create a new version for this page.' The content tab is selected, showing a rich text editor toolbar. The content area contains the text 'This is our newest product presented in the video.' Below this is a video player showing two men shaking hands at an event. The video player has a play button and a timestamp of '00:00'. At the bottom, there's a section titled 'Cms content widgets' with four entries: 'product', 'product\_set', 'product\_group', and 'product\_search', each with usage information and available templates.

```

product
Usage information: {{ product(['sku1','sku2']) }}, to use different template {{ product(['sku1','sku2'],'default') }}

Marketing

Finance

...

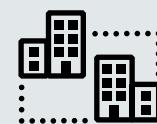

What

Increase your revenue by expanding globally

Details

The Spryker Commerce OS enables you to seize opportunities across the globe and seamlessly expand across international markets. Create multiple stores to target different markets or launch one adaptive store that services several different regions. Choose to share your catalog and stocks between stores or offer separate product ranges in different regions. Easily localize the pricing, project domains and all your content.

B2B

B2C

...

Features

International Tax Rates &amp; Sets

Multiple Store Setup

Multiple Currencies per Store

Glossary Creation

# Internationalization Features

## Glossary Creation

In the Glossary you can easily store basic text information in different languages so your customers can switch to their preferred one. In the shop, all stored text keys will automatically be adjusted, once language is switched. By default, languages are identified by a locale, e.g. de\_DE meaning “German language in Germany” and de\_CH means “German language in Switzerland”.

#	Name	en_US	de_DE	Actions
31	auth.lm-new-customer	New Customer	Ich bin Neukunde	<button>Edit</button>
32	auth.lm-already-customer	I already have an account	Ich habe bereits ein Konto	<button>Edit</button>
33	navigation.menu.categories	Categories	Kategorien	<button>Edit</button>

## Multiple Currencies per Store

The Spryker Commerce OS lets you define multiple currencies per store for product, product option and shipping method.

A product can for example cost 5 EUR in Germany, 6 EUR in France and 5 CHF in Switzerland. Your customers may easily choose between these different currencies. All prices on the Product Page and in the Cart are adjusted automatically upon changing the currency. Products for which you did not define a price in a specific currency do not appear in the catalog for that currency.

		Gross price			Net price		
		DEFAULT	ORIGINAL	SUPPLIER	DEFAULT	ORIGINAL	SUPPLIER
AT	CHF						
	€						
DE	CHF	453.87			408.48		
	€	394.67			355.20		
US	CHF	363.10			326.78		
	€	315.74			284.16		

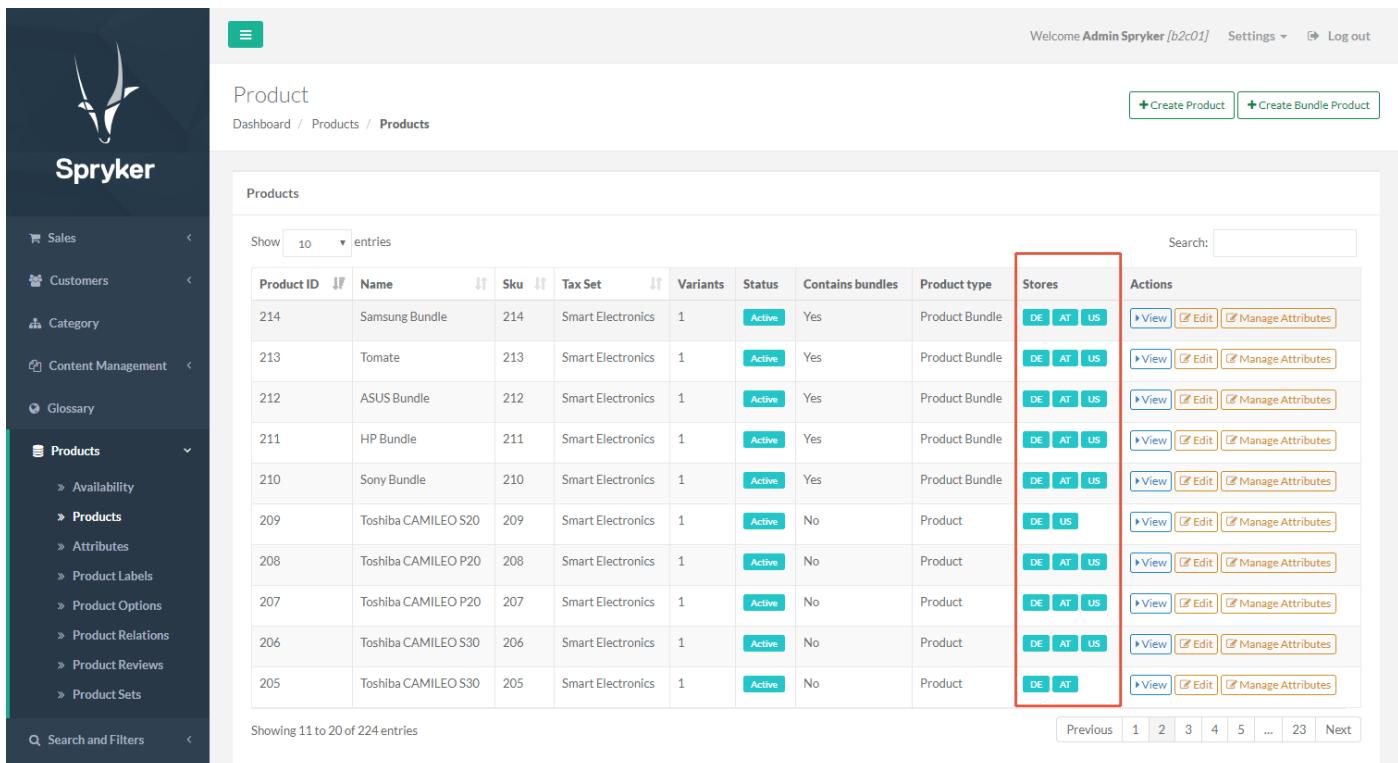

Tax Set  
Smart Electronics

## International Tax Rates & Sets

Align your business with international tax standards by defining tax rates and sets. Determine country-based tax rates for products, options and shipments, that will automatically be applied to the respective shops.

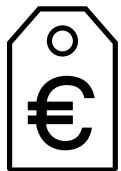

## Multiple Store Setup

With the Spryker Commerce OS you can freely create Multiple Stores for different scenarios that suit your business needs. Build one Store that services multiple countries and languages or setup a different store for each region. Easily share abstract products, discounts and other logics and code between stores or separate your setup for each. You can for example define separate search preferences to create an entirely different set of rankings, rules and settings per store. The Multi Store Setup is very versatile and can be customized to your needs.

The screenshot shows the Spryker Product management interface. On the left is a dark sidebar with navigation links: Sales, Customers, Category, Content Management, Glossary, Products (with sub-links: Availability, Products, Attributes, Product Labels, Product Options, Product Relations, Product Reviews, Product Sets), and Search and Filters. The main area has a light gray background. At the top, there's a header bar with the Spryker logo, the text "Welcome Admin Spryker [b2c01]", "Settings", and "Log out". Below the header is a breadcrumb trail: "Dashboard / Products / Products". There are two buttons on the right: "+ Create Product" and "+ Create Bundle Product". A search bar labeled "Search:" is also present. The main content area is titled "Products" and contains a table with 10 entries. The columns are: Product ID, Name, Sku, Tax Set, Variants, Status, Contains bundles, Product type, and Stores. The "Stores" column is highlighted with a red border. Each row in this column contains three buttons: "DE", "AT", and "US". To the right of the table is a "Actions" column with buttons for "View", "Edit", and "Manage Attributes" for each product entry. At the bottom of the table, it says "Showing 11 to 20 of 224 entries" and includes a pagination bar with buttons for "Previous", "1", "2", "3", "4", "5", "...", "23", and "Next".

Auto-Detect of Currency

Net &amp; Gross Price Mode

Volume prices

Measurement Units

# Price Features

## Auto-Detect of Currency

The Spryker Commerce OS automatically registers the store's currency your customer selects and manages orders accordingly. Prices, Payment and Shipping costs are all converted automatically.

Alternatively, prices can manually be changed by the customer.

The screenshot shows a storefront interface for Spryker. At the top, there is a navigation bar with the Spryker logo, a search bar, and a language selector (en). Below the navigation, there is a dropdown menu for price selection, with "Net prices" currently selected. The main content area displays a "Digital Cameras" category page. On the left, there is a sidebar with categories like "Cameras & Camcorders" and "Smart Wearables". The main content area shows a grid of digital cameras with various filters and sorting options at the top. One camera in the grid has a "SALE %" label.

## Volume prices

With the Volume Prices feature, you can define different prices of a product for different order quantities. Set specific volume thresholds for your products to encourage your customers to purchase larger quantities of a product in order to receive the special volume discount.

## Measurement Units

different measuring units.

Separate internal and external selling units to efficiently monitor your stock levels. A minimum and maximum order quantity can be defined to avoid over- or underselling. You can also freely define the intervals in which the products can be purchased.

Depending on your type of business you may not need to sell your products in quantities, but in length, weight or volume. The Spryker Commerce OS allows you to offer your products in a variety of

### Net & Gross Price Mode

You can easily manage gross and net prices per product, country, currency or anything else and define which price you want to display in the shop. In turn, your customers can choose their preferred currency when visiting your store.

#### Price & Tax

Below you can choose between your predefined tax sets and edit the price of your product.

*Note: The price that you edit here is only displayed in the shop catalog and the product detail page for the non configured product (Not product variant)*

		Gross price			Net price

# Promotions & Discounts

## Features

### Discount Engine

Discounts are a tool to support sales and marketing activities. With the intuitive discount query builder you can easily define which items the discount should apply to, such as single products, product groups, specific attributes or other relevant indicators. Choose the type of discount you want to offer, percentual or fixed monetary values, net or gross price, free complementary products or other options. Lastly, outline exactly when the discounts should be applicable, e.g. only to specific customer groups, when a certain cart value is reached, how long the discount should be valid or any business logic you need. Discounts are either automatically applied during the Checkout process or your customers have to enter a Voucher Code.

### Time Limited Offers

You can easily create exclusive, limited product offers by combining a Time Limited Content or Product Page and combine it with Discounts.

### New Product Indication

Products that were recently added to your shop can automatically be marked with the Dynamic Product Label "New" for a pre-defined time range.

When importing or creating new products, simply add validity dates for the "New" label.

### Product Promotions

You can easily establish your own set of rules for triggering specific Product Promotions. Product Attributes, Cart Values, seasonal sales or events are only a few examples.

### Vouchers

Boost your sales and increase traffic by giving out voucher codes to your customers so they can get a discount on their purchases. Voucher Codes can be one-time-only or multiple-use codes with a value and validity that can be freely defined. Also, all vouchers are grouped in clusters for a better overview and can be exported for easier handling.

All Voucher Codes are added in the cart or checkout and will be applied to the respective products.

# Cart Features

## Cart Functionality & Calculations

The extensive Cart feature allows your customers to add and remove products to their Cart by simply selecting the desired quantity. Inside the Cart, the customer can

change the quantity of items, switch between different Variants of the product, add personal notes and apply vouchers. The total price is immediately adjusted whenever changes are made to the Cart. Additionally, logged-in customers can see and edit their Cart from any device. As an additional option, the Persistent Cart functionality lets logged-in customers store their Cart throughout multiple sessions.

The Cart features also ensures that your business rules, such as discounts, taxes or shipping, will be applied, based on the customer's final choice of items.

With the Mini-Cart symbol in the header of the page your customers can easily check the contents of their Cart via a flyout box.

## Payment Provider Integration

The Spryker Commerce OS offers integrations with several payment providers that can be used in the checkout and order management. Easily define the availability of a provider based on customer preferences and local regulations and specify the order the providers are displayed in during checkout.

## Refund Management

Refunds can be handled automatically in the Administration Interface, once the order has been delivered. Your customers can return the entire order or parts thereof by means of the order splitting mechanism. Every order contains information on the total possible refund value and how much has already been refunded.

## Multiple Payment Methods per Order

customer's requirements, you can offer multiple payment methods for a single order, such as gift card and an additional credit card.

All orders can be paid with none, one or multiple payment methods which the customer can select during checkout. To accommodate your

# Gift Cards

Who

End-Customer

Marketing

.....

What

Acquire new customers through gift card payment options.

Details

Effectively up your sales by allowing your customers to purchase and redeem gift cards. Gift card purchases can boost your brand awareness and help you reach new customers. Additionally you also benefit from shoppers who redeem gift cards, as they usually spend 20%+ on top of the card's value. Gift cards are treated as a separate payment method. In case of any remaining balance, customers can choose to keep it on their gift card or receive a replacement code with the new balance.

B2B

B2C

.....

Features

Gift Cards Purchase &amp; Management

# Gift Cards

## Features

### Gift Cards Purchase & Management

The simple Gift Cards feature can help you increase website traffic, gain new customers and boost brand awareness. The purchase of a gift card generates an individual code that can then be used as a payment method during checkout.

When paying with a gift card, customers are enabled to only use part of the total card value. The remaining value can either be stored as leftover balance on the original code.

During the Gift Card purchase process, shipment prices can be omitted, if the card is send via email. Also, to avoid fraud, certain payment methods, such as invoice, can be faded out.

# Checkout

Who

End-Customer

Marketing

Logistics

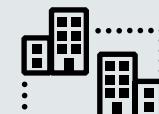

What

Reduce the dropout rate with a smooth checkout workflow.

Details

Offer customers a smooth shopping experience and customize the checkout workflow all the way. Add, delete and configure any step of the process, like customer account login, shipment and payment methods or checkout overview. Enable customers to select single or multiple products and add wishlist items to their cart. Easily integrate different carriers and delivery methods.

Great Camera

by Sarah

on Jun. 06, 2018 13:44

It was pretty good for the money but it was quite slow to connect to my Laptop. It took longer a bit than it would with any other canon camera to upload videos even if they were the same length of time. Great pictures, quality is really good!

## Order Processing

With the Spryker Commerce OS you can process orders from your online store, via a manual order creation form or various external touchpoints, such as voice or car apps.

## State Machine Modelling

State Machines help you define, execute and visualize predefined and automated processes. It can model events that involve performing a predetermined sequence of actions, for example in the order process, e.g. order is being shipped if the payment is successful. You can tailor the State Machine to your needs to trigger certain processes automatically or execute them manually.

B2C

Check your inventory levels at a glance. The powerful Administration Interface allows you to easily keep an overview of your stock levels to display accurate availabilities on your store site. Any open orders, and therefore reserved items are taken into consideration when stock availabilities are displayed.

Features

Multiple Warehouse Stock Management

Stock & Availability Management

# Inventory Management Features

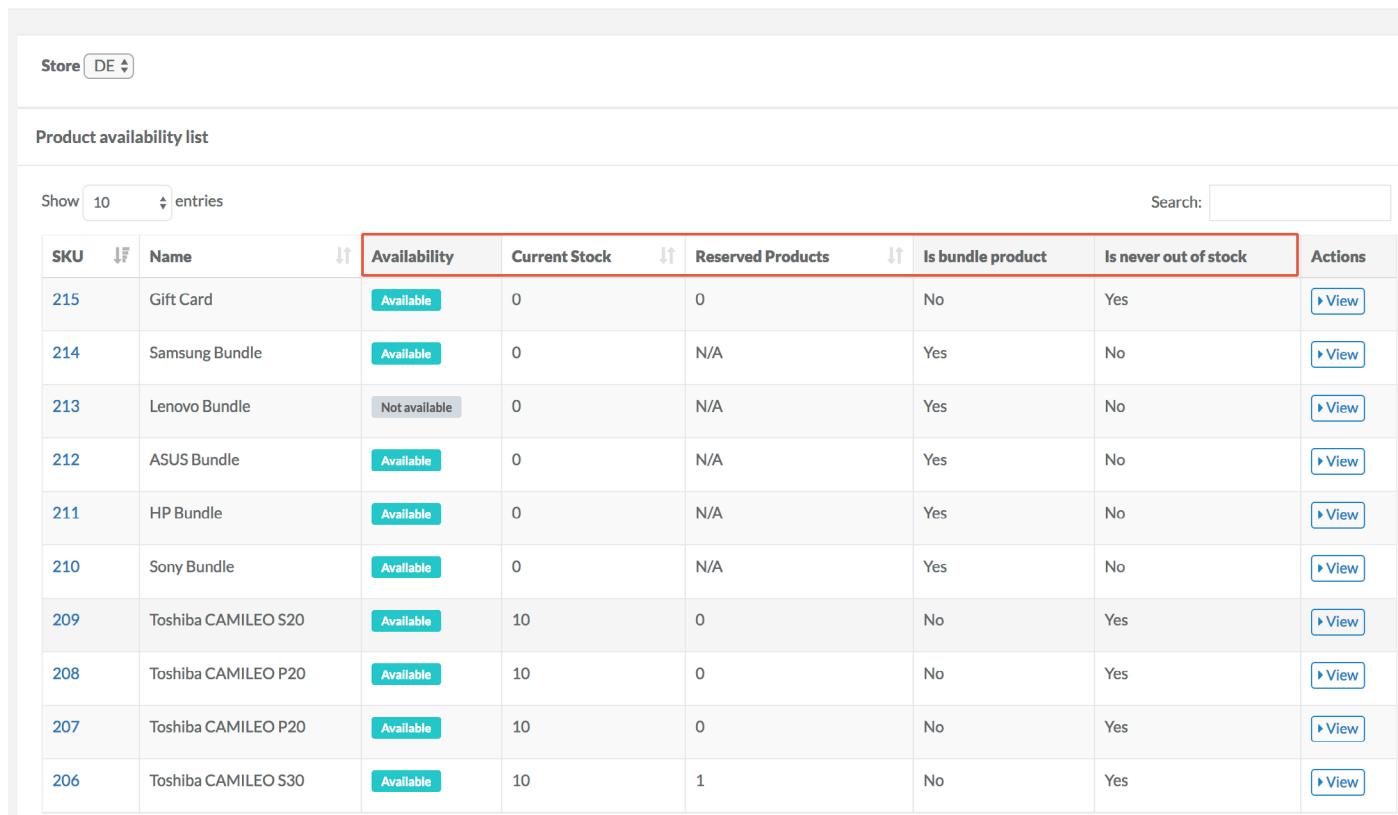

## Stock & Availability Management

The fully automated Stock calculation takes into consideration products that are reserved in open orders when defining availability. Also, you can define never-out-of-stock products, such as digital downloads.

In contrast to Stock, Availability considers not only the number of products in the warehouse, but currently open orders, too. Product Availability defines if a product can or cannot be sold in the shop.

### Products Availability

Dashboard / Products / Availability

The screenshot shows a table titled "Product availability list" with the following columns: SKU, Name, Availability, Current Stock, Reserved Products, Is bundle product, Is never out of stock, and Actions. The table contains 11 rows of data. The "Availability" column uses color-coded buttons: "Available" (green) for most items and "Not available" (grey) for the Lenovo Bundle. The "Actions" column contains "View" buttons for each row.

SKU	Name	Availability	Current Stock	Reserved Products	Is bundle product	Is never out of stock	Actions
215	Gift Card	Available	0	0	No	Yes	<button>View</button>
214	Samsung Bundle	Available	0	N/A	Yes	No	<button>View</button>
213	Lenovo Bundle	Not available	0	N/A	Yes	No	<button>View</button>
212	ASUS Bundle	Available	0	N/A	Yes	No	<button>View</button>
211	HP Bundle	Available	0	N/A	Yes	No	<button>View</button>
210	Sony Bundle	Available	0	N/A	Yes	No	<button>View</button>
209	Toshiba CAMILEO S20	Available	10	0	No	Yes	<button>View</button>
208	Toshiba CAMILEO P20	Available	10	0	No	Yes	<button>View</button>
207	Toshiba CAMILEO P20	Available	10	0	No	Yes	<button>View</button>
206	Toshiba CAMILEO S30	Available	10	1	No	Yes	<button>View</button>

## Multiple Warehouse Stock Management

Your product's availability is calculated on a per-store basis, meaning you can manage stocks across all international entities from a single

interface and make logistics management more efficient.

## Manage Customer Accounts

In the Customer Management feature you can view and edit customer accounts, see details and check order history. The Customer Accounts function allows you to group your customers to target them for exclusive or limited offers.

Your customers can create an account to save their contact details, addresses, order history and preferences, such as language and shipping options.

Tailor the customer registration to your needs. A customer can simply register with an email address and a password or you can choose to ask for more details. Once a customer enters the required information, a customer account is created.

All accounts are password protected. Passwords can easily be restored with a restore-password link.

## Data Protection

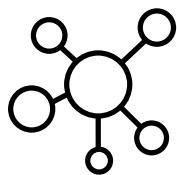

The Spryker Commerce OS is fully compliant with international GDPR regulations.

For example, customers can delete their account information, subscribe or unsubscribe from newsletters. Shop owners can also delete a customer account through the Administration Interface. However, this action does not affect billing and order related information. Deleting an account anonymizes customer information and address data.

## Administration Interface Functionalities

Manage all Back Office tasks in the Administration Interface. Here you can manage user and administrator accounts, create products pages, extend your catalog and navigation, create content, maintain price, tax and currency options, check orders and many more.

# Multi-Channel

Development Tools

# Development Features

## Importer

Easily import your business logics and data, such as Product Information, Customer Base, Categories and many more into the Spryker Commerce OS.

## Development Tools

The Spryker Commerce OS provides your developers with a range of coding tools that make sure your OS run smoothly.

- Code sniffer: This will validate the code style
- Architecture sniffer: Checks whether the code follows the Spryker architecture
- Code generator: Lets you generate modules or parts of modules (application layers)
- PHP Stan: Static code analyzer for code introspection, helps to reduce bugs

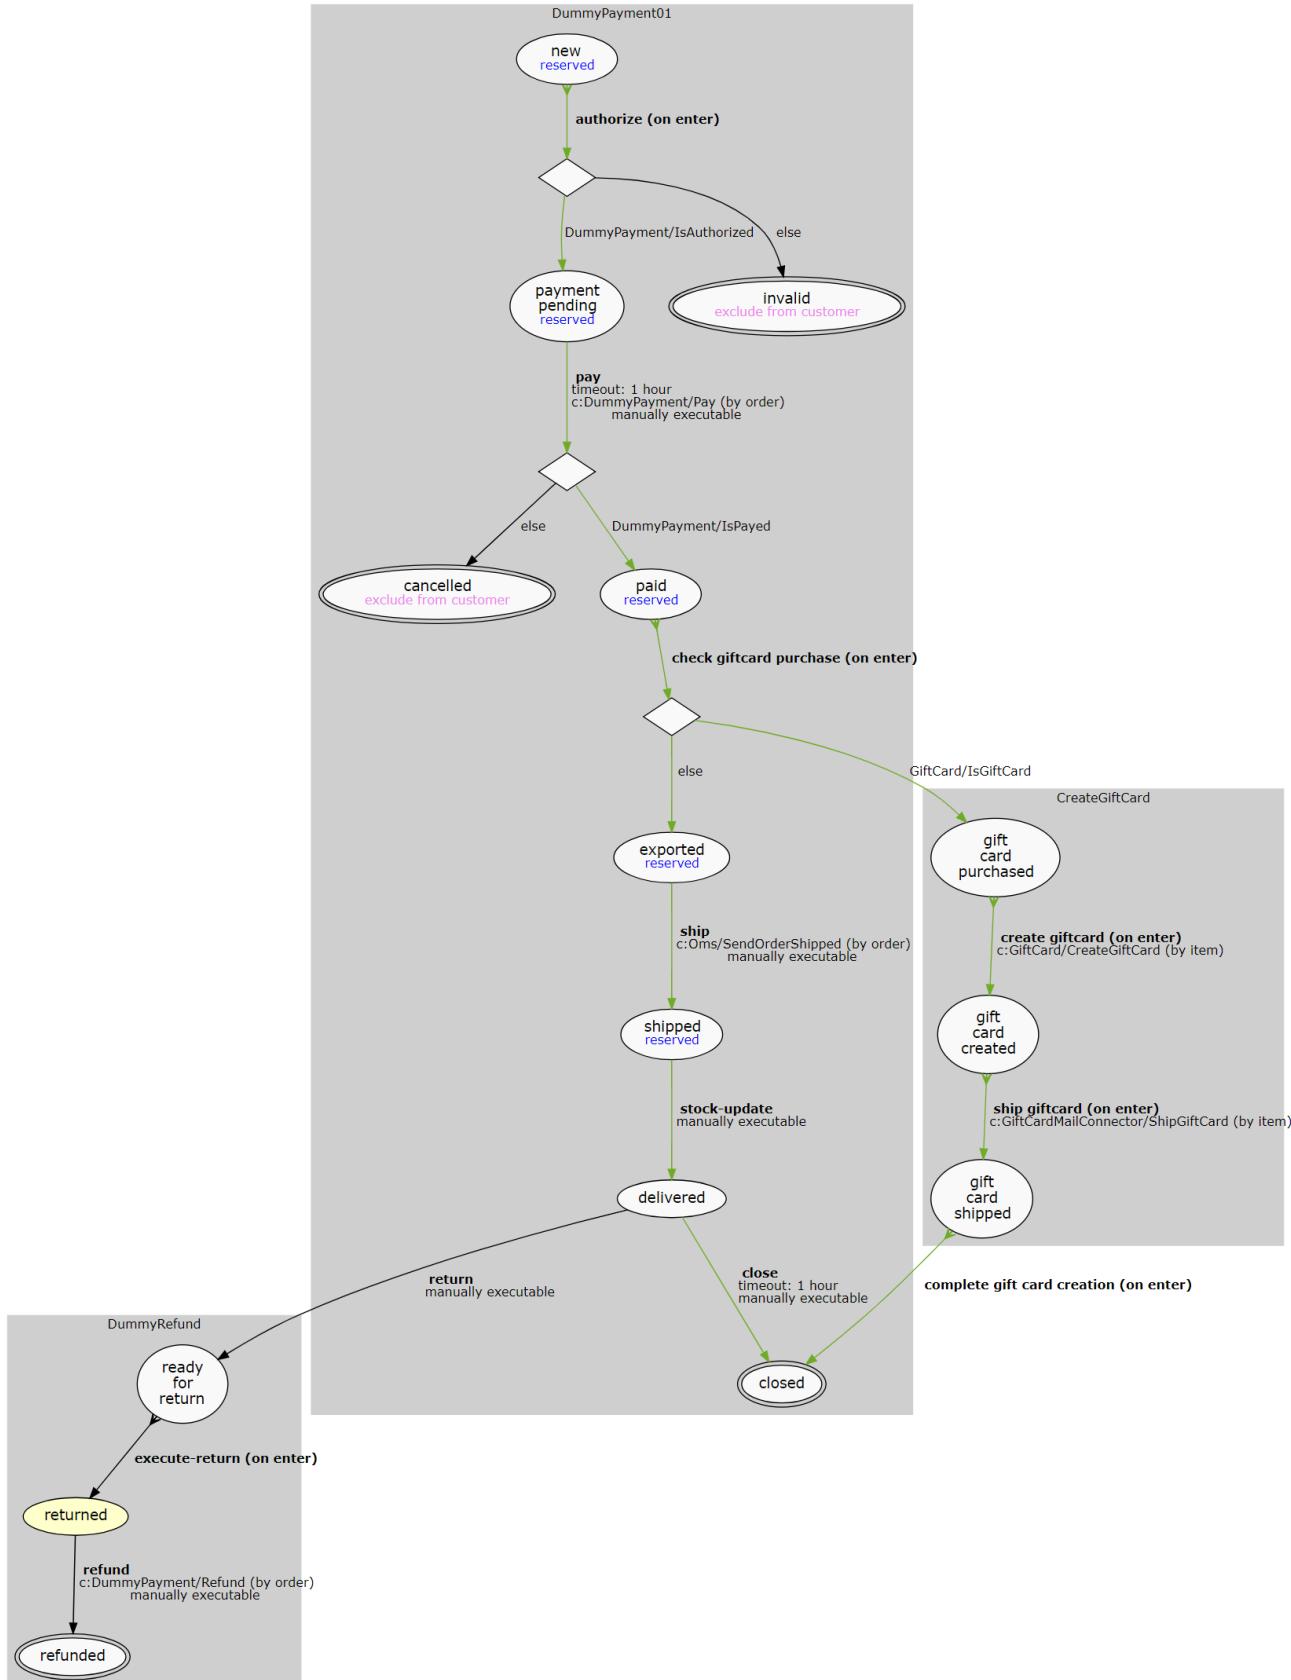

The OS is fully equipped with a production/ staging deployment solutions for different cloud platforms, like AWS.

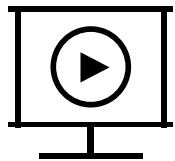

## Cronjob Scheduling

To enable your system to process all requests effortlessly, the Spryker Commerce OS is equipped with a Cronjob Scheduling feature. All jobs can be scheduled and executed automatically or manually. Jobs are versioned and can easily be changed by your own developers.

## Development Virtual Machine & Console

With the Spryker Commerce OS comes an all-inclusive and fully pre-provisioned development environment on a virtual machine, based on Vagrant and VirtualBox. The command-line Console tool enables you to execute a great variety of commands, such as managing the Spryker Commerce OS installer, to run the OS in any environment.

# Sample Suite & Custom Suite

Who

Developer

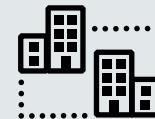

What

Get a glimpse of the Spryker Commerce OS functionalities and install our Sample Suites.

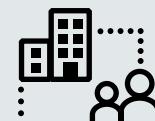

Details

The Spryker Sample Suite is a fully functional, out-of-the-box online shop application. It offers all common functionalities and workflows and can be used as a boilerplate to kick-start your project. With the Dummy Payments feature you are able to perform a sample payment to test the checkout process. Furthermore the Custom Suites offer an opportunity to test a shop application that is tailored to more specific business needs.
